Literary Information in China Bruce Rusk, Anatoly Detwyler, Christopher Nugent, Xiao Liu, Jack W. Chen, 2021-05-11 Information has become a core concept across the disciplines yet it is still often seen as a unique feature of the Western world that became central only in the digital age In this book leading experts turn to China s textual tradition to show the significance of information for reconceptualizing the work of literary history from its beginnings to the present moment Contributors trace the organization of literary information across China s three millennia of history examining the forms and

practices of information management that have evolved alongside the increasing scale and complexity of textual production. They reimagine literary history as information processing detailing the many kinds of storage, encoding, sorting, and transmission that constitute and feed back into China's long and ever-growing cultural tradition. The volume features state-of-the-field essays on all major forms of literary information management, from graphs to internet literature and from commentaries to literary museums and archives. By shifting focus from individual works and their authors to the informatic schemata of literature, it identifies three scales of information management: the word, the document, and the collection, and surveys the forms that operate at each level, such as the dictionary, the anthology, and the library. *Literary Information in China* is a groundbreaking work that provides a systematic and innovative reassessment of literary history with implications that extend beyond the particular Chinese context, revealing how informatic practices shape literary tradition. **The**

prior training in Chinese thought The Political Philosophy of Zhang Taiyan Viren Murthy, 2011-02-28 Zhang Taiyan 1868-1936 is famous for being one of the first thinkers in China to promote revolution in the early twentieth century. Scholars have addressed Zhang's revolutionary and nationalist thought but until this work there has not been any sustained engagement with Zhang's Buddhist writings which aimed to understand and criticize the world from the perspective of consciousness. These philosophical works are significant because they exemplify how as Chinese intellectuals entered the global capitalist world they constantly tried to find resources to create an alternative. As the author argues in the conclusion, this desire to create an alternative to capitalism remained throughout twentieth-century China and continues today in the works of critical intellectuals such as Wang Hui. Thus, this work is important not only to understand our past but to hope for a better future.
