## **Sisters Of The Earth Womens Prose And Poetry About Nature:**

Sisters of the Earth Lorraine Anderson, 2003-12-09 *Sisters of the Earth* is a stirring collection of women's writing on nature: Nature as healer, Nature as delight, Nature as mother and sister, Nature as victim, Nature as companion and reminder of what is wild in us all. Here among more than a hundred poets and prose writers are Diane Ackerman on the opium of sunsets, Ursula K. Le Guin envisioning an alternative world in which human beings are not estranged from their planet, and Julia Butterfly Hill on weathering a fierce storm in the redwood tree where she lived for more than two years. Here too are poems, essays, stories, and journal entries by Emily Dickinson, Alice Walker, Terry Tempest Williams, Willa Cather, Gretel Erlich, Adrienne Rich, and others, each offering a vivid eloquent response to the natural world. This second edition of *Sisters of the Earth* is fully revised and updated with a new preface and nearly fifty new pieces, including new contributions by Louise Erdrich, Pam Houston, Zora Neale Hurston, Starhawk, Joy Williams, Kathleen Norris, Rita Dove, and Barbara Kingsolver.

Woman Spirit Awakening in Nature Nancy Barrett Chickerneo, Ph.D., 2012-01-09 *Dare to Take Ownership of the Wildness and Wonder of Your Truest Self*: Nature is there for you, waiting to reflect your deepest self back to you and to teach you the Creator's wisdom. A step into nature's embrace is always a step into a richer, fuller life. The door is wide open; come on out from Beginning. This book is your invitation to experience the life-energizing process of reclaiming your spiritual roots through nature, be it your backyard or the wilds of the forest. Nancy Barrett Chickerneo, a twenty-year veteran leading women's retreats, guides you on a journey into nature to reconnect with your senses: what you see, hear, touch, taste, and smell, in order to reactivate your ability for personal discovery. Combining creativity, playfulness, and spiritual depth, she poses eight life-changing questions that help you explore ways to awaken, transform, and nurture your spirit. Practical exercises for individual or group use encourage you to let go of self-judgment and seek balance in your everyday life, empowering you to find your own path to spiritual growth. Whether you have picked up this book out of curiosity, longing, even skepticism, you will be inspired to get out there into nature to reclaim the person you were created to be. *Early American Nature Writers* Daniel Patterson, 2007-11-30 At a time when the environment is of growing concern to students and general readers, nature writing is especially meaningful. This book profiles the literary careers of 52 early American nature writers such as John James Audubon, Ralph Waldo Emerson, Caroline Stansbury Kirkland, Thomas Jefferson, Henry David Thoreau, and Mabel Osgood Wright. Each entry is written by an expert contributor and discusses the writer's life and works. Entries close with primary and secondary bibliographies, and the encyclopedia ends with suggestions for further reading. Global warming, pollution, and other issues have made the environment a topic of constant discussion these days. Many environmental concerns were treated by early American nature writers who recognized the beauty of the natural world in an age of commercial expansion. Some of the most famous writers of the 18th and 19th centuries wrote about nature, and their works are stylistic masterpieces. At a time when students are being encouraged to read and write about nonfiction, these masterworks of early

**Meat Culture** Annie Potts,2016-11-21 The analysis of meat and its place in Western culture has been central to Human Animal Studies as a field It is even more urgent now as global meat and dairy production are projected to rise dramatically by 2050 While the term carnism denotes the invisible belief system or ideology that naturalizes and normalizes meat consumption in this volume we focus on meat culture which refers to all the tangible and practical forms through which carnist ideology is expressed and lived Featuring new work from leading Australasian European and North American scholars Meat Culture edited by Annie Potts interrogates the representations and discourses practices and behaviours diets and tastes that generate shared beliefs about perspectives on and experiences of meat in the 21st century Climate Consciousness and Environmental Activism in Composition Joseph R. Americans still do not believe that humans are the primary cause of Earth's climate change crisis the burden on educators to inform challenge and motivate students about sustainability is greater than it ever has been On college campuses writing intensive courses often located within First Year or General Education curricula are an ideal place to take up this charge because of the flexibility of their content and the high volume of students that they reach In this volume a varied group of composition instructors with wide ranges and types of experiences provides best practices for bringing issues surrounding climate change into the writing classroom From literature based composition and creative writing courses to design thinking workshops to seminars against sustainability the authors in this volume lay out a multitude of possibilities for blending writing and environmental concerns that fellow practitioners can easily adopt or modify for their own use **Feminism and Ecological Communities**

Christine Cuomo, 2002-09-11 **Feminism and Ecological Communities** presents a bold and passionate rethinking of the ecofeminist movement It is one of the first books to acknowledge the importance of postmodern feminist arguments against ecofeminism whilst persuasively presenting a strong new case for ecological feminism Chris J Cuomo first traces the emergence of ecofeminism from the ecological and feminist movements before clearly discussing the weaknesses of some ecofeminist positions Exploring the dualisms of nature culture and masculinizing feminine that are the bulwark of many contemporary ecofeminist positions and questioning traditional feminist analyses of gender and caring **Feminism and Ecological Communities** asks whether women are essentially closer to nature than men and how we ought to link the oppression of women people of colour and other subjugated groups to the degradation of nature Chris J Cuomo addresses these key issues by drawing on recent work in feminist ethics as well as the work of diverse figures such as Aristotle John Dewey Donna Haraway and Maria Lugones A fascinating feature of the book is the use of the metaphor of the cyborg to highlight the fluidity of the nature culture distinction and how this can enrich ecofeminist ethics and politics An outstanding new argument for an ecological feminism that links both theory and practice **Feminism and Ecological Communities** bravely redraws the ecofeminist map It will be essential reading for all those interested in gender studies environmental studies and philosophy *Eco-man* Mark Christopher Allister, 2004 Many canonical literary works look to the wild as the site for establishing a man's selfhood But nature is just as often subjected to his most violent displays of mastery This tension lies at the heart of *Eco Man* which brings together two rapidly growing fields men's studies and ecocriticism

The ISLE Reader Michael P. Branch, Scott Slovic, 2003 This volume gathers nineteen of the most representative and defining essays from the journal *ISLE Interdisciplinary Studies in Literature and Environment* over the course of its first ten years Following an introduction that traces the stages of ecocriticism's development *The ISLE Reader* is organized into three sections each of which reflects one of the general goals the journal has sought to accomplish The section titled *Re-evaluations* provides new readings of familiar environmental writers and new environmental perspectives on authors or literary traditions not usually considered from a green perspective The writings in *Reaching Out to Other Disciplines* promote

cross pollination among various disciplines and methodologies in the environmental arts and humanities The writings in the final section New Theoretical and Practical Paradigms are especially significant for the conceptual and methodological terrain they map The ISLE Reader documents the state of research in ecocriticism and related interdisciplinary fields provides a survey of the field and points to new methodologies and possibilities for the future
