Eastmancolor's arrival on the British filmmaking scene is one of intermittent trial and error, intense debate and speculation before gradual acceptance. This book traces the journey of its adoption in British Film and considers its lasting significance as one of the most important technical innovations in film history. Through original archival research and interviews with key figures within the industry, the authors examine the role of Eastmancolor in relation to key areas of British cinema since the 1950s, including its economic and structural histories, different studio and industrial strategies, and the wider aesthetic changes that took place with the mass adoption of colour. Their analysis of British cinema through the lens of colour produces new interpretations of key British film genres, including social realism, historical and costume drama, science fiction, horror, crime, documentary, and even sex films. They explore how colour communicated meaning in films ranging from the Carry On series to Monty Python's Life of Brian (1979), from Lawrence of Arabia (1962) to A Passage to India (1984), and from Goldfinger (1964) to 1984 (1984), and in the work of key directors and cinematographers of both popular and art cinema, including Nicolas Roeg, Ken Russell, Ridley Scott, Peter Greenaway, and Chris Menges.

[Animation Masterclasses: From Pencils to Pixels](#) Tony White, 2022-11-17
Today it is commonly believed that if you learn software, you can become an animator. Yet nothing could be further from the truth. Master animators are trained, and not born. Software, as is the humble pencil, is merely yet another tool through which an animator can apply their knowledge. However, neither software nor pencils give you that knowledge, nor do they do the work for you. If you place a fully trained master animator on a computer or give them a pencil, they'll astound you with their mastery. However, if you put a nontrained animator on a computer, all you will have is a technician creating moving objects as you'll see all over YouTube and other video platforms. This book teaches you exactly how to become a Master Animator, whether you ultimately plan to use pencils, computers, drawing tablets, or rigged characters. It's a complete course, being a collection of 48 masterclasses gleaned from the author's 50 years of experience of

top level animating teaching and filmmaking It will also train you in the value and application of observational gesture drawing This book of masterclasses by a master of the art Tony White is entirely designed to be THE definitive reference book for students learning how to make things move well as well as how to create films once you know how to do so A book for everyone For home based self study students It is a perfect manual to take you from raw beginner to proven animated filmmaker For full time students It is an ideal companion to supplement your full time educational studies which no doubt is overly based on software technology For current animation professionals It is a comprehensive archive of animation tips and techniques that will enable you to take your work to the next level For current animation educators and instructors It is a book that can be the ultimate curriculum and study program enabling your own students to become the master animators of today and tomorrow
