Brown,Kent G. Lightfoot,Nancy J. Turner,Dana Lepofsky,2024-11-05 Linguistic and Genetic mtDNA Connections between Native Peoples of Alaska and California Ancient Mariners of the Middle Holocene traces the linguistic and biological connections between contemporary Aleut people of southwest Alaska and historic Utian people of central California During the Middle Holocene Period Aleut and Utian languages diverged from their common parent language Proto Aleut Utian PAU spoken by people who resided on or near Kodiak Island in coastal southwest Alaska Around the time of divergence Utians departed the PAU homeland migrating by watercraft along the eastern Pacific coast to the San Francisco Bay Area The affiliation between Aleut and Utian languages is strongly supported by comparative linguistics and by the genetic link mtDNA of groups speaking these languages On their migration Utians encountered coastal groups speaking languages different from

their own Through these prolonged and intimate interactions words were borrowed from Utian into the languages of these native coastal communities Other significant findings explored in this book are the lack of compelling evidence for the kinship of Eskimo and Aleut peoples despite scholarship s long term acceptance of this proposal and the discovery of language structure features shared by Yeniseian and Na Dene indicating an historical connection for these circumarctic languages *Traditional Ecological Knowledge and Natural Resource Management* Charles R. Menzies,2006-01-01

Traditional Ecological Knowledge and Natural Resource Management examines how traditional ecological knowledge TEK is taught and practiced today among Native communities Of special interest is the complex relationship between indigenous ecological practices and other ways of interacting with the environment particularly regional and national programs of natural resource management Focusing primarily on the northwest coast of North America scholars look at the challenges and opportunities confronting the local practice of indigenous ecological knowledge in a range of communities including the Tsimshian the Nisga a the Tlingit the Gitksan the Kwagult the Sto lo and the northern Dene in the Yukon The experts consider how traditional knowledge is taught and learned and address the cultural importance of different subsistence practices using natural elements such as seaweed Gitga a pine mushrooms Tsimshian and salmon Tlingit Several contributors discuss the extent to which national and regional programs of resource management need to include models of TEK in their planning and execution This volume highlights the different ways of seeing and engaging with the natural world and underscores the need to acknowledge and honor the ways that indigenous peoples have done so for generations *The Oxford Handbook of Language Prosody* Carlos Gussenhoven,Aoju Chen,2021-01-07 This handbook presents detailed accounts of current research in all aspects of language prosody written by leading experts from different disciplines The volume s comprehensive coverage and multidisciplinary approach will make it an invaluable resource for all researchers students and practitioners interested in prosody *Language Use and Linguistic Structure. Proceedings of the Olomouc Linguistic Colloquium 2023* Janebová, Markéta,Čakányová, Michaela,Emonds, Joseph, The latest volume of OLINCO proceedings is a selected set of sixteen papers that grew from presentations at OLINCO 2023 the international Olomouc Linguistics Colloquium held at Palack University in June 2021 The papers collected here are unified by the topic of the colloquium Language Use and Linguistic Structure in that they all in one way or the other address the central questions of the study of human language They all use standard scientific methodology and theory and solidly researched empirical evidence in favor of formalized structural representations of the language system **Handbook of North American Indians, Volume 17** William C. Sturtevant,1978 Encyclopedic summary of prehistory history cultures and political and social aspects of native peoples **Tsimshian Culture** Jay Miller,2000-10-01 The Tsimshians are a Northwest Coast Native people known for their dazzling works of art and rich array of social religious and oral traditions that have captured the attention of scholars for over a century Jay Miller brings together for the first time a wealth of material about the Tsimshians presenting an

unforgettable picture of their cultural universe That universe is built around the metaphor of light which was brought into the world by Raven its refraction forms the chief social religious and symbolic institutions of Tsimshian culture Family heraldic crests express light in one way masks in another Miller argues convincingly that the genius of Tsimshian culture and one of the main reasons for its continuing vitality is that its people are sensitive to different and often creative ways of capturing and embodying light

Linguistic Variation in the Minimalist

Framework M. Carme Picallo, 2014-07-24 In this book leading scholars consider the ways in which syntactic variation can be accounted for in a minimalist framework They explore the theoretical significance content and role of parameters whether or not variation should be strongly or weakly accounted for by syntactic factors and the explicitness or lack thereof that should be assumed with respect to the conditions imposed by narrow syntax The book is divided into two parts The first part contains chapters that consider the term parameter to be a relevant theoretical notion under minimalist tenets In the second part on the other hand chapters either argue that the term parameter amounts to no more than a label to describe variation or assign it a less prominent role Instead language variation is attributed to sociolinguistic factors language contact frequency of use or simply to options in the externalization of abstract syntactic relations The book offers a valuable overview of the different approaches adopted in the study of language variation phenomena and will appeal to theoretical linguists of
