(Joseph)), 1958 **Mass Society** Salvador Giner, 2013-10-22 Mass Society deals with the total outlook of human including modern politics culture social inequality community life and problems The book reviews the history of democracy and discontent The text analyzes the mob rule the disenchantment of progress and the history of democracy Modern sociological theory explains the opposition of two extreme societal models to describe the historical dynamics of mankind The book is an attempt to explain that a mass society outlook exists and has some inner coherence and distinctive quality The author argues that such outlook or theory is a prominent feature in the cultural imagination of man and that modern secular society cannot be understood without such theory The author then proceeds to identify majority with mass and the identification of human with mass human This identification will lead to a community vision though the author argues the growth of a mass interpretation of society has a negative effect on the liberal theory of the individual The text can be interesting for political science majors sociologists psychologists and economists

Craig Calhoun, Chris Rojek, Bryan S Turner, 2005-06-18 Sociology has evolved greatly since its inception as an academic discipline It has diverged into numerous strands often flowing in disparate directions so much so that today the notion of canonical sociology has become widely disputed The field of sociology at present approximates to one of multi paradigmatic complexity in which many approaches to theory must be distinguished and situated In addition the discipline has had to confront new challenges from globalization the shift of interest from production to consumption the rise of new social movements the challenge of bio engineering the collapse of a presently existing socialist alternative and much else besides The new SAGE Handbook of Sociology aims to address these new developments while at the same time providing an

authoritative guide to theory and method the key sub disciplines and the primary debates of today To undertake this ambitious project three leading figures in the field of sociology were selected as editors to bring together the foremost exponents of the different strands that contribute towards the make up modern sociology Drawn from both sides of the Atlantic the contributors have been commissioned to utilise the most up to date research available to provide a critical international analysis of their area of expertise The result is this essential resource collection that not just reflects upon the condition of sociology today but also looks to future developments in the discipline The Handbook is invaluable not just all sociologists but to a wide variety of students and researchers across the social sciences Click on Sample Chapters Resources to download the introduction

**Invisible Crisis of Contemporary Society** Bernard S Phillips, Louis C. Johnston, 2015-12-03 Is there a growing gap in today s world between cultural aspirations and their fulfillment a gap that is increasing social problems of all kinds If so what forces are producing that gap How can these forces be changed To answer these questions Phillips and Johnston employ a very broad approach to the scientific method drawing evidence from a wide variety of data and sources including sociologists psychologists political scientists historians philosophers educators psychiatrists and novelists They find substantial evidence for a widening gap suggesting an invisible crisis throughout contemporary society They also find substantial evidence that a simplistic and static metaphysical stance or worldview is largely responsible for that gap and that an alternative worldview can work to close that gap

*Democracy in Our America* Paul W. Kahn, 2023-01-31 One of America s most distinguished political theorists examines what happens when national politics enters a small New England town After the election of 2016 and even more urgently after the election of 2020 many citizens looked at the economic and cultural divisions that were causing deep disruptions in American politics and asked What is happening to us Paul W Kahn explores these fundamental changes as they show themselves in a small New England town his home of twenty five years Killingworth Connecticut His inquiry grounds a democratic theory that puts volunteering not voting at its center Absent active participation citizens lose the capacity for judgment that comes from working with others to solve real problems Volunteering however is under existential threat today

Changes in civil society commerce employment and public opinion formation have isolated families from each other and from their communities Even middle class families live under financial stress uncertain of their children s future and without the support of civil society Local media has disappeared Residents do not have the time information or interest to volunteer Under these conditions national polarization enters local politics which becomes yet another site for national conflict To save our democracy Kahn concludes we need to find ways of matching opportunities for participation to the ways we live our lives today

**The New Middle Classes** Arthur J. Vidich,2016-07-27 This volume is designed first to provide a theoretical orientation and historical perspective on the rise of the middle classes in modern civilization and second to portray the social and political roles these classes have played and continue to play in the United States over the past century with particular reference to the American class structure and political economy Our method is necessarily both historical and sociological and offers an orientation for understanding contemporary American society The essays included here were written between 1926 and 1982 they reveal both the genealogical development of sociological thought about the middle classes and the substantive content of these classes life styles status claims and political orientations The present work stresses empirical studies and puts forth neither a theoretical interpretation nor a conceptual taxonomy rather it delineates the emergence and

the social and political significance of the new middle classes in relation to the classes above and below that preceded them

**Selling Science** Stephen E. Mawdsley, 2016-08-01 Today when many parents seem reluctant to have their children vaccinated even with long proven medications the Salk vaccine trial which enrolled millions of healthy children to test an unproven medical intervention seems nothing short of astonishing In *Selling Science* medical historian Stephen E Mawdsley recounts the untold story of the first large clinical trial to control polio using healthy children 55 000 healthy children revealing how this long forgotten incident cleared the path for Salk's later trial Mawdsley describes how in the early 1950s Dr William Hammon and the National Foundation for Infantile Paralysis launched a pioneering medical experiment on a previously untried scale Conducted on over 55 000 healthy children in Texas Utah Iowa and Nebraska this landmark study assessed the safety and effectiveness of a blood component gamma globulin to prevent paralytic polio The value of the proposed experiment was questioned by many prominent health professionals as it harbored potential health risks but as Mawdsley points out compromise and coercion moved it forward And though the trial returned dubious results it was presented to the public as a triumph and used to justify a federally sanctioned mass immunization study on thousands of families between 1953 and 1954 Indeed the concept conduct and outcome of the GG study were sold to health professionals medical researchers and the public at each stage At a time when most Americans trusted scientists their mutual encounter under the auspices of conquering disease was shaped by politics marketing and at times deception Drawing on oral history interviews medical journals newspapers meeting minutes and private institutional records *Selling Science* sheds light on the ethics of scientific conduct and on the power of marketing to shape public opinion about medical experimentation **The**

**Enigmatic Academy** Christian J. Churchill, Gerald Levy, 2011-06-15 *The Enigmatic Academy* is a provocative look at the purpose and practice of education in America Authors Christian Churchill and Gerald Levy use three case studies a liberal arts college a boarding school and a Job Corps center to illustrate how class bureaucratic and secular religious dimensions of education prepare youth for participation in American foreign and domestic policy at all levels The authors describe how schools contribute to the formation of a bureaucratic character how middle and upper class students are trained for leadership positions in corporations government and the military and how the education of lower class students often serves more powerful classes and institutions Exploring how youth and their educators encounter the complexities of ideology and bureaucracy in school *The Enigmatic Academy* deepens our understanding of the flawed redemptive relationship between education and society in the United States Paradoxically these three studied schools all prepare students to participate in a society whose values they oppose

refugees from the revolution of 1848 in Germany They were members of the Turnverein a society of liberal thinkers who were a political minority in Germany In founding New Ulm they established a utopian ethnic community became the town s status elite and for a long time monopolized its economic political and cultural life Professor Iverson analyzes four aspects of sociological change in the community class status power and assimilation Each aspect is viewed according to the differences found between two generations of the upper status group the Turners and two corresponding generations of non Turners In addition to its substantive contribution to our knowledge of ethnic settlements the study demonstrates a gain in methodological precision over many earlier studies of ethnic communities Its chief methodological innovation is in the use of scales to verify and measure the changing structure of class status and power and to gauge the extent of assimilation The book is of interest not only to sociologists especially those concerned with the study of community change but also to political scientists interested in the study of community power structures Also the methodology will be instructive to those interested in the design of community studies
