Smoked The Inside Story Of The Minnesota Tobacco Trial:

Smoked Deborah Caulfield Rybak, David Phelps, 1998 **The Fight Against Big Tobacco** Mark Wolfson, 2017-07-12

Tobacco control leaders were extremely proud of the movement's achievements in the state of Minnesota. In sharing their perspectives and experiences with Mark Wolfson, they found a way of making sure that the story would get told. His training in social movements had given him an appreciation of the importance of understanding the social infrastructure on which movements are built and Minnesota had built heavily on the infrastructure of health care and public health. What became apparent is that the struggle against the tobacco industry in Minnesota involved a close collaborative relationship between government or state actors and the leaders of the tobacco control movement. Wolfson develops both of these themes building on the infrastructure of health and state movement interpenetration to understand the emergence, growth, and outcomes of the tobacco control movement in Minnesota. He focuses on the advantages and constraints associated with these two related themes. He goes beyond the case study method to assess the generalizability of the pattern and whether the same sort of movement can be used by other states in North America and even in other countries and their social movements. How has the tobacco control movement become such a significant and successful force in shaping public policy, social norms, and the habits of millions of Americans? In this first such detailed study by a sociologist, Wolfson documents how the movement has grown over nearly three decades by building an infrastructure of health organizations and health professionals and by fostering relationships with government. Rich in survey data, extensive interviews, and archival sources, this text is essential reading for courses in social problems, social movements, and public health. The general reader will also find it engaging given the issues of tobacco use as an addiction and a social problem.

Up in Smoke Martha A. Derthick, 2011-07-26

In recent years, tobacco politics has been a multi-layered issue fraught with significant legal, commercial, and public policy implications. From the outset, Martha A. Derthick's *Up in Smoke* took a nuanced look at tobacco politics in a new era of adversarial legalism and the consequences, both intended and unintended, of the MSA Master Settlement Agreement. Now with a brand new 3rd edition, the book returns to ordinary politics and the passage of the Family Smoking Prevention and Tobacco Control Act, which gave the FDA broad authority to regulate both the manufacture and marketing of tobacco products. Derthick shows our political institutions working as they should, even if slowly, with partisanship and interest group activity playing their part in putting restraints on cigarette smoking.

The Cigarette Century Allan M. Brandt, 2009-01-06

The invention of mass marketing led to cigarettes being emblazoned in advertising and film, deeply tied to modern notions of glamour and sex appeal. It is hard to find a photo of Humphrey Bogart or Lauren Bacall without a cigarette. No product has been so heavily promoted or has become so deeply entrenched in American consciousness. And no product has received such sustained scientific scrutiny. The development of new medical knowledge demonstrating the dire harms of smoking ultimately shaped the evolution of evidence-based medicine. In response, the tobacco industry engineered a campaign of scientific disinformation.

seeking to delay disrupt and suppress these studies Using a massive archive of previously secret documents historian Allan Brandt shows how the industry pioneered these campaigns particularly using special interest lobbying and largesse to elude regulation But even as the cultural dominance of the cigarette has waned and consumption has fallen dramatically in the U S Big Tobacco remains securely positioned to expand into new global markets The implications for the future are vast 100 million people died of smoking related diseases in the 20th century in the next 100 years we expect 1 billion deaths worldwide

Unfiltered Associate Director Eric Feldman, 2004-08-15 Tobacco among the most popular consumer products of the twentieth century is under attack Once a behavior that knew no social bounds cigarette smoking has been transformed into an activity that reflects sharp differences in social status Unfiltered tells the story of how anti smoking advocates public health professionals bureaucrats and tobacco corporations have clashed over smoking regulation The nations discussed in this book Australia Canada Denmark France Germany Japan the United Kingdom and the United States restrict tobacco advertising tax tobacco products and limit where smoking is permitted Each is also struggling to shape a tobacco policy that ensures corporate accountability protects individual liberty and asserts the state s public health power Unfiltered offers a comparative perspective on legal political and social conflicts over tobacco control The book makes a unique contribution to our understanding of how scientific evidence global health advocacy individual risk assessments and governmental interests intersect in the crafting of tobacco policy It features national case studies and cross cultural essays by experts in health policy law political science history and sociology The lessons in Unfiltered are crucial to all who seek to understand and influence tobacco policy and reduce tobacco related mortality worldwide

Statistical Science in the Courtroom Joseph L. Gastwirth, 2012-12-06 Expert testimony relying on scientific and other specialized evidence has come under increased scrutiny by the legal system A trilogy of recent U S Supreme Court cases has assigned judges the task of assessing the relevance and reliability of proposed expert testimony In conjunction with the Federal judiciary the American Association for the Advancement of Science has initiated a project to provide judges indicating a need with their own expert This concern with the proper interpretation of scientific evidence especially that of a probabilistic nature has also occurred in England Australia and in several European countries Statistical Science in the Courtroom is a collection of articles written by statisticians and legal scholars who have been concerned with problems arising in the use of statistical evidence A number of articles describe DNA evidence and the difficulties of properly calculating the probability that a random individual s profile would match that of the evidence as well as the proper way to interpret the result In addition to the technical issues several authors tell about their experiences in court A few have become disenchanted with their involvement and describe the events that led them to devote less time to this application Other articles describe the role of statistical evidence in cases concerning discrimination against minorities product liability environmental regulation the appropriateness and fairness of sentences and how being involved in legal statistics has raised interesting statistical problems requiring further research

Up in Smoke Martha Derthick, 2005 In a landmark report by the U S Surgeon General in 1964 the government warned its citizens of the adverse effects of smoking on their health and took a series of steps to discourage smoking These steps stemmed from ordinary politics that is actions taken or authorized by legislatures 1994 heralded a new era in tobacco politics of adversarial legalism wherein state attorneys general sued leading cigarette manufacturers for the harm they had done to public health These law suits culminated in the Master Settlement Agreement MSA that directed an estimated 250 billion to state governments over the next 25 years and imposed new marketing and advertising restrictions In her second edition Martha Derthick introduces new evidence from 5 years of experience under the MSA to show that the states were more interested in raising revenue than in improving tobacco control that the enrichment of wealthy tort lawyers violated the legal profession s ethics and that the agreement ironically spawned the rise of small upstart cigarette manufacturers able to undersell the major companies In this clearly written fast paced case study Derthick concludes that the tobacco lawsuits not only produced flawed public policy that flouted the American system of checks and balances but has done little to improve or better safeguard public health

Legality and Community Philip Selznick, 2002 Bridging sociology legal and social theory and moral philosophy this volume explores the significance of Philip Selznick s work in a variety of social contexts particularly the search for responsive law and governance humane institutions and a balance between freedom and communal life

Corporate Report, 1999 **Emerging Moral Vocabularies** Brian M. Lowe, 2006-01-01 A central observation of the social sciences has been that the modern age is one of constant change This change has resulted in the emergence of new moral and ethical claims and understandings which author Brian M Lowe refers to as moral vocabularies Lowe skillfully seeks to explain conditions under which certain moral vocabularies are more likely to gain acceptance in the wider host society By focusing on the animal rights and tobacco control movements this absorbing work explores the process of moralization and the fragmentary nature of the emergence of new forms of moral and ethical meanings within the wider host society *Emerging Moral Vocabularies* challenges the broad assertion that Western post industrial societies are inevitably becoming more individualistic and self centered and instead encourages scholars to examine emerging forms of moral and ethical meanings which create new moral boundaries Book jacket

Nicotine Psychopharmacology Jack E. Henningfield, Edythe London, Sakire Pogun, 2009-02-01 The fact that tobacco ingestion can affect how people feel and think has been known for millennia placing the plant among those used spiritually honori cally and habitually Corti 1931 Wilbert 1987 However the conclusion that nicotine counted for many of these psychopharmacological effects did not emerge until the nineteenth century Langley 1905 This was elegantly described by Lewin in 1931 as follows The decisive factor in the effects of tobacco desired or undesired is nicotine Lewin 1998 The use of nicotine as a pharmacological probe to und stand physiological functioning at the dawn of the twentieth century was a landmark in the birth of modern neuropharmacology Limbird 2004 Halliwell 2007 and led the pioneering researcher John Langley to conclude that there must exist some ceptive substance to explain the diverse actions of various substances including nicotine when applied to muscle tissue Langley 1905 Research on tobacco and nicotine progressed throughout the twentieth century but much of this was from a general pharmacological and toxicological rather than a psychopharmacological perspective Larson et al 1961 There was some attention to the effects related to addiction such as euphoria Johnston 1941 tolerance Lewin 1931 and withdrawal Finnegan et al 1945 but outside of research supported by the

tobacco industry addiction and psychopharmacology were not major foci for research Slade et al 1995 Hurt and Robertson 1998 Henning eld et al 2006 Henning eld and Hartel 1999 Larson et al 1961 *History of the Minnesota Horticultural Society...*, 1899 Historians as Expert Judicial Witnesses in Tobacco Litigation Ramses Delafontaine, 2015-04-23

Historian Ramses Delafontaine presents an engaging examination of a controversial legal practice the historian as an expert judicial witness This book focuses on tobacco litigation in the U S wherein 50 historians have witnessed in 314 court cases from 1986 to 2014 The author examines the use of historical arguments in court and investigates how a legal context influences historical narratives and discourse in forensic history Delafontaine asserts that the courtroom is a performative and fact making theatre Nonetheless he argues that the civic responsibility of the historian should not end at the threshold of the courtroom where history and truth hang in the balance The book is divided into three parts featuring an impressive range of European and American case studies The first part provides a theoretical framework on the issues which arise when history and law interact The second part gives a comparative overview of European and American examples of forensic history This part also reviews U S legal rules and case law on expert evidence as well as extralegal challenges historians face as experts The third part covers a series of tobacco related trials With remunerations as high as hundreds of thousands of dollars and no peer reviewed publications or communication on the part of the historians hired by the tobacco companies the question arises whether some historians are willing to trade their reputation and that of their university for the benefit of an interested party The book further provides 50 expert profiles of the historians active in tobacco litigation lists detailing the manner of the expert s involvement and West Law references to these cases This book offers profound and thought provoking insights on the post war forensification of history from an interdisciplinary perspective In this way Delafontaine makes a stirring call for debate on the contemporary engagement of historians as expert judicial witnesses in U S tobacco litigation
