The Hygiene Of Health And Disease:

The Hygiene of Health and Disease Herbert M. Shelton, 2005-12-01 This scarce antiquarian book is a facsimile reprint of the original. Due to its age it may contain imperfections such as marks, notations, marginalia and flawed pages. Because we believe this work is culturally important, we have made it available as part of our commitment for protecting, preserving, and promoting the world's literature in affordable, high-quality modern editions that are true to the original work. **Health and Disease in Relation to Marriage and the Married State** Hermann Senator, 1929 *Health, Disease and Society in Europe, 1800-1930* Deborah Brunton, 2004-09-04 *Health, Disease and Society in Europe 1800-1930* provides readers with unrivaled access to a comprehensive range of sources on major themes in nineteenth and early twentieth-century medicine. The book covers issues such as the changing role of the hospital, disease, colonial and imperial medicine, women, war, the emergence of modern surgery, welfare and the state, and the growth of asylum. Extracts from contemporary writings vividly illustrate key aspects of medical thought and practice, while a selection of classic historical research and up-to-date work in the field gives a sense of our understanding of medical history. Introductions make the sources accessible to the student as well as the interested general reader. *Hygienic Modernity* Ruth Rogaski, 2004 Placing meanings of health and disease at the center of modern Chinese consciousness, Ruth Rogaski reveals how hygiene became a crucial element in the formulation of Chinese modernity in the nineteenth and twentieth centuries. Rogaski focuses on multiple manifestations across time of a single Chinese concept, *weisheng*, which has been rendered into English as hygiene, sanitary, health, or public health, as it emerged in the complex treaty port environment of Tianjin. Before the late nineteenth century, *weisheng* was associated with diverse regimens of diet, meditation, and self-medication. *Hygienic Modernity* reveals how meanings of *weisheng* with the arrival of violent imperialism shifted from Chinese cosmology to encompass such ideas as national sovereignty, laboratory knowledge, the cleanliness of bodies, and the fitness of races, categories in which the Chinese were often deemed lacking by foreign observers and Chinese elites alike. **The Hygiene of Transmissible Diseases** Alexander Crever Abbott, 1901

Building Bottom-up Health and Disaster Risk Reduction Programmes Emily Ying Yang Chan, 2017-12-08 As a backdrop of the Sustainable Development Goals (SDGs) 2016-2030, the United Nations pointed out that more than 6 million children still died before the age of five by 2015. At least 1.8 billion people across the world still consumed fecally contaminated drinking water, and 2.4 million lacked access to basic sanitation services such as toilets or latrines, while nearly 1,000 children died every day of preventable water and sanitation-related diarrhoeal diseases. Rural areas fare far worse. Children in rural areas are about 1.7 times more likely to die before their fifth birthday than those in urban areas. About 16 per cent of the rural population do not use improved drinking water sources compared to 4 per cent of the urban population. About 50 per cent of people living in rural areas lack improved sanitation facilities compared to only 18 per cent of people in urban areas. Far too many one-off rural on-site public health knowledge transfer projects fail to deliver results in the long run, and the knowledge

in question cannot be retained in the rural communities after the NGO and development workers are gone In addition to external constraints this is often due to a lack of theoretical understanding among NGO practitioners and volunteers and basis for evaluation and improvement of health relief programmes Based on public health theories and illustrated by relevant examples this book introduces how health emergency and disaster preparedness education programmes could be organised in remote rural Asia which could become useful reference materials for organisers and volunteers of rural development projects This book is an introductory to intermediate level textbook and reference book for healthcare professionals fieldworkers volunteers and students who are interested in promoting health and emergency and disaster risk reduction The book is developed from the experience and insights gained from the long established CCOUC Ethnic Minority Health Project in China It also incorporates new lessons from CCOUC s recent projects in Asia countries like Bhutan Nepal and Democratic People s Republic of Korea
