National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1982 **Non-standard Collection Management** M. Pearce, 2018-11-09 First published in 1992 this volume recognises that it is not unusual when practising librarianship to come across small to medium collections within the library which because they are different from the main collection are outside the librarian s experience or are a new type of material not properly managed or exploited Therefore this volume contains chapters on a range of materials which are united by a certain rarity in the experience of most librarians It is aimed at those who need to know how to progress from scratch with a collection but not necessarily to take it into complete specialization There is information about characteristics of each type of material as well as guidance for their management Lists of further reading are provided and a note of some important collections **Guide to American Directories**, 1994 **Interlibrary Loan Practices Handbook** Virginia Boucher, 1997 In this new edition of the definitive Interlibrary Loan Practices Handbook edited by CheriT Weible and Karen Janke expert contributors clearly explain the complexities of getting materials for patrons from outside the library This collection presents a complete view of the interlibrary loan ILL process with contributions from all areas of the technical services community providing Guidance on how to do ILL efficiently and effectively with advice on being a considerate borrower and lender Details of preferred staffing and management techniques showing how best practices can be implemented at any institution Discussion of important issues that can fall between the cracks such as hidden copyright issues and the logistics of lending internationally As consortia and other library partnerships share ever larger fractions of their collections this book gives library staff the tools

necessary for a smoothly functioning ILL system
