The Golden Age Ian Inkster, Colin Griffin, Judith Rowbotham, 2017-07-05 In 1850 the Industrial Revolution came to an end In 1851 the Great Exhibition illustrated to the whole world the supremacy of industrial England For the next twenty years Britain reigned supreme From around 1870 Britain began to decline Britain is now a second rate power with strong memories of its former supremacy The above five sentences summarise a common view of the sequencing of Britain's rise and relative fall a stereotype that is challenged and modified in the essays of *The Golden Age* By concentrating on central aspects of social and industrial change authors expose the underpinnings of supremacy its unsung underside its tarnished gold Major themes cover industrial and technological change social institutions and gender relations in a period during which industry and industrialism were equally celebrated and nurtured Against this background it is difficult to argue for any sudden decline of energy assets or institution nor for any significant move from an industrial society to one in which a hearty manufacturing was replaced by commerce and land sensibility and artifice

Cook, 2008-01-30 Working Women Literary Ladies explores the simultaneous entry of working class women in the United States into wage earning factory labor and into opportunities for mental and literary development It is the first book to examine the fascinating exchange between the work and literary spheres for laboring women in the rapidly industrializing America of the nineteenth and early twentieth centuries As women entered the public sphere as workers their opportunities for intellectual growth expanded even as those same opportunities were often tightly circumscribed by the factory owners who were providing them These developments both institutional and personal opened up a range of new possibilities for working class women that profoundly affected women of all classes and the larger social fabric Cook examines the extraordinary and diverse literary productions of these working women ranging from their first New England magazine of belles lettres The Lowell Offering to Emma Goldman s periodical Mother Earth from Lucy Larcom s epic poem of female factory life An Idyl of Work to Theresa Malkiel s fictional account of sweatshop workers in New York The Diary of a Shirtwaist Striker This vital new book traces the hopes and tensions generated by the expectations of working class women as they created a wholly new way of being alive in the world
