The Informed Vision David Hawkins, 2002 An education classic is back in print Fifteen seminal essays explore how children develop their understanding of the world around them *The Study Of Primary Education* Colin Conner, Brenda Lofthouse, 2003-10-04 The four books are intended to be used by students taking BEd or PGCE courses and by teachers in service taking diploma or higher degree courses in primary education The material extracted can be used by tutors as a focus for seminars or as reading to back up lectures and by students as a source for essays or as a starting point for further reading The books are not intended to be read straight through from cover to cover but can be selectively and flexibly used at various stages in the course For convenience the extracts have been organized into a number of sections Volume 1 comprises extracts which examine primary education from historical ideological philosophical sociological and psychological perspectives Volume 2 deals with curriculum studies Volume 3 with school organization and management and Volume 4 with teaching and classroom studies Because of limitations of space primary education has been confined to the education of children aged 5 to 11 though the compilers acknowledge that in doing so they may offend those teachers in nursery or middle schools who regard themselves justifiably as primary practitioners

Practicing Pragmatism through Progressive Pedagogies Susan Jean Mayer, 2023-12-01 This book contributes to the contemporary revival of pragmatism as a practical and ultimately as Mayer argues necessary philosophical stance within democratic schools Given that pragmatism addresses the question of how people can move forward in the absence of transcendent Truth the author shows how pragmatism also and not incidentally provides grounds for pluralistic democratic societies to move forward in the absence of shared belief

In Search of Wonderful Ideas Mary Kay Delaney, Susan Jean Mayer, 2021 Drawing on the work of Eleanor Duckworth this volume examines Critical Exploration in the Classroom CEC a learning teaching research practice that positions teachers as researchers of their students sense making and learners as theorizers and investigators By integrating CEC into their teacher education classrooms chapter authors have found that they can reliably unsettle their teacher candidates understandings about the nature of teaching and learning and recenter their attention on the intellectual originality and creativity of all young people In this way CEC provides valuable tools in the work of creating more equitable and democratic classrooms Such tools are needed in a broader environment that overvalues instrumental approaches to achieving specified learning outcomes Readers will find practices that empower and sustain the deep intellectual engagement of all learners Integrating classroom narratives and other forms of documentation this resource illustrates the kinds of profound changes in understanding that have occurred for teacher candidates as a result of working with CEC Book Features Opens both the teacher educator and teacher candidates to new ways of teaching learning and being in classrooms Demonstrates how the practice works to counter deficit thinking by revealing students brilliance Uses narratives and other forms of documentation to characterize the potential of CEC within a diverse array of teacher education classrooms Portrays the many ways in which CEC has been integrated into different disciplinary and institutional settings illustrating the common intellectual and interpersonal dynamics at work Chapter authors all studied Critical Exploration in the Classroom CEC with its originator Eleanor Duckworth Contributors Elizabeth Cavicchi Eleanor Duckworth Fiona Hughes McDonnell Keri Gelenian Houman Harouni Yeh Hsueh Susan Rauchwerk Lisa Schneier William Shorr Bonnie Hao Kuo Tai

Colonial Space J.K. Noyes, 2012-10-12 First Published in 1992 This book is about space of a colony and how it was produced It began as a study of the literature of the German colony of South West Africa between the years 1884 and 1915 The author s aim is to demonstrate the active role which literature had played in structuring the experience of the colony If it could be shown that

literature not only describes but also helps to structure the forms of experience then it would follow that it also plays an important role in structuring the experience of colonization and hence the form of the colony itself From the outset therefore the study was concerned with a number of issues centering around colonization representation experience and social form where spatiality is the concept which allows us to understand how these various aspects of colonialism interrelate
