African Americans in the U.S. Economy Cecilia

Conrad,2005 Over the last several decades academic discourse on racial inequality has focused primarily on political and social issues with significantly less attention on the complex interplay between race and economics African Americans in the U S Economy represents a contribution to recent scholarship that seeks to lessen this imbalance This book builds upon and significantly extends the principles terminology and methods of standard economics and black political economy Influenced by path breaking studies presented in several scholarly economic journals this volume is designed to provide a political economic analysis of the past and present economic status of African Americans The chapters in this volume represent the work of some of the nation s most distinguished scholars on the various topics presented The individual chapters cover several well defined areas including black employment and unemployment labor market discrimination black entrepreneurship racial economic inequality urban revitalization and black economic development The book is written in a style free of the technical jargon that characterizes most economics textbooks While the book is methodologically sophisticated it is accessible to a wide range of students and the general public and will appeal to academicians and practitioners alike

The Economies Of Central City Neighborhoods Richard Bingham,Zhongcai Zhang,2018-03-05 In The Economies of Central City Neighborhoods Bingham and Zhang examine the location of industry employment in a variety of producer and consumer oriented industries in relation to major neighborhood characteristics such as demographic labor force socioeconomic and housing variables While the primacy of poverty is an aspect of central city neighborhoods that drives the growth and decline of neighborhood economies it implies the significance of effective intervention at early stages of neighborhood economic disintegration Neighborhood cluster of industries suggests a direction of neighborhood redevelopment and the pervasive spill over effects of this necessitate the coordination among redevelopment initiatives of bordering neighborhoods The research in this text contributes to the urban literature by providing an industry by industry analysis of the economies of central city sub areas in Ohio This study is informative and illuminating to central city revitalization redevelopment planning and related efforts that often take place at the neighborhood level

Financing Economic Development in the 21st Century Sammis B. White,Richard D. Bingham,Edward W. Hill,2003 Comprises 17 papers which explore alternative ways of financing local economic development

Discusses the various goals of economic development that communities might seek and examines funding techniques used by the developer tax incremental financing location incentives development exaction public financing enterprise zones and other incentives and private finance Also describes financing in special situations where the more common forms of finance might not be sufficient Includes case studies of specific projects **Urban America Reconsidered** David L. Imbroscio, 2011-01-15

The aftermath of Hurricane Katrina laid bare the tragedy of American cities What the storm revealed about the social conditions in New Orleans shocked many Americans Even more shocking is how widespread these conditions are throughout much of urban America Plagued by ineffectual and inequalitarian governance acute social problems such as extreme poverty and social and economic injustice many American cities suffer a fate similar to that of New Orleans before and after the hurricane Gentrification and corporate redevelopment schemes merely distract from this disturbing reality Compounding this tragedy is a failure in urban analysis and scholarship Little has been offered in the way of solving urban America's problems and much of what has been proposed or practiced remains profoundly misguided in David Imbroscio's view In *Urban America Reconsidered* he offers a timely response He urges a reconsideration of the two reigning orthodoxies in urban studies regime theory which provides an understanding of governance in cities and liberal expansionism which advocates regional policies linking cities to surrounding suburbs Declaring both approaches to be insufficient and sometimes harmful Imbroscio illuminates another path for urban America remaking city economies via an array of local economic alternative development strategies or LEADS Notable LEADS include efforts to build community based development institutions worker owned firms publicly controlled businesses and webs of interdependent entrepreneurial enterprises Equally notable is the innovative use of urban development tools to generate indigenous stable and balanced growth in local economies *Urban America Reconsidered* makes a strong case for the LEADS approach for constructing progressive urban regimes and addressing America's deepest urban problems *The Oxford Handbook of Urban Economics and Planning* Nancy Brooks, Kieran Donaghy, Gerrit-Jan Knaap, 2012-01-12 This volume embodies a problem driven and theoretically informed approach to bridging frontier research in urban economics and urban regional planning The authors focus on the interface between these two subdisciplines that have historically had an uneasy relationship Although economists were among the early contributors to the literature on urban planning many economists have been dismissive of a discipline whose leading scholars frequently favor regulations over market institutions equity over efficiency and normative prescriptions over positive analysis Planners meanwhile even as they draw upon economic principles often view the work of economists as abstract not sensitive to institutional contexts and communicated in a formal language spoken by few with decision making authority Not surprisingly papers in the leading economic journals rarely cite clearly pertinent papers in planning journals and vice versa Despite the historical divergence in perspectives and methods urban economics and urban planning share an intense interest in many topic areas the nature of cities the prosperity of urban economies the efficient provision of urban services efficient systems of

transportation and the proper allocation of land between urban and environmental uses In bridging this gap the book highlights the best scholarship in planning and economics that address the most pressing urban problems of our day and stimulates further dialog between scholars in urban planning and urban economics
