Educational Futures Ivana Milojevic, 2005-05-19 This book provides an overview and analysis of current tensions debates and key issues within OECD nations particularly Australia the USA Canada and the UK with regard to where education is and should be going Using a broad historical analysis it investigates ideas and visions about the future that are increasingly evoked to support arguments about the imminent demise of the dominant modern educational model Focusing neither on prediction nor prescription this text suggests the goal is an analysis of the ways in which the notion of the future circulates in contemporary discourse Five specific discourses are explored globalisation new information and communications technologies feminist indigenous and spiritual The book demonstrates the connections between particular approaches to time visions of the future and educational visions and practices The author asserts that every approach to educational change is inherently based on an underlying image of the future Edutopias , 2006-01-01 Education has always been part of the search for the ideal society and therefore an important part of the utopian tradition in Western culture politics and literature Education has often served to define the ideal society or to provide the principal means of creating it This unique collection of essays by well known scholars from around the world examines the role of edutopias in the utopian tradition examining its sources and sites as a means for understanding the aims and purposes of education for realizing its societal value and for criticizing its present economic technological and organizational modes These essays will stimulate new thinking in ways that impinge on both theoretical and practical questions as well as offering the reader a series of reminders of the ethical and political dimensions of education and its place in helping to build good and just societies The collection is aimed at an audience of teachers and graduate students although it will also be of interest to administrators policy makers and the general public interested in utopian thinking and its relation to education Fast Lane to the Future Joseph M.
