Biocidal Theodore Michael Dracos, 2010-11-16 The first full account of the scientific and political dynamics of global PCB contamination and its threat to human health and the environment Whether or not you've heard of PCBs polychlorinated biphenyls it's likely that this toxic chemical can be found in your cells PCBs were invented in 1920 for the electronics industry fueled the WWII military machine then were put to domestic uses and finally came to be present in every corner of the earth Because PCBs were outlawed in 1976 most people think they are no longer a threat However like many industrial chemicals PCBs persist in our environment and continue to accumulate in practically every life form on earth becoming more concentrated in the tissues of those highest on the food chain like us In *Biocidal* investigative journalist Ted Dracos explores the science behind how PCBs affect the environment amphibians fish and mammals He also draws on extensive research to document the connection between PCBs and catastrophic human illness From the beginning even as workers in the first manufacturing plants quickly began to suffer skin lesions boils liver failure and death the industry denied the danger of its chemicals and manipulated science regulatory agencies and the government to continue to make and distribute PCBs throughout the next half century Dracos provides the latest scientific findings in the heated controversy that surrounds the continued health impacts of PCBs ranging from cancer to immunosuppression endocrine disruption fetal brain development reproductive abnormalities and even autism Yet *Biocidal* is optimistic leaving readers with a complete and surprisingly uncomplicated blueprint of what can be done and is being done to counter the risks and damages of PCBs and other industrial chemicals

Life and Learning of Korean Artists and Craftsmen Dae Joong Kang, 2015-04-17 This book brings out the need for lifelong learning theory and explores how it is possible from a postmodern perspective The book uses life history that has gained its popularity in social science research to overcome the dichotomy between individual and society or between agency and structure Life history also reflects the postmodern or late modern conditions of social life In this book

the author uses a collection of published oral history narratives of famous Korean artists and craftsmen The author maps out life and learning of five such artists and craftsmen with figurations of escaping creating controlling and formalizing These figurations are images of Rhizoactivity that the author proposes as a new conceptual tool to navigate lifelong learning from a postmodern perspective This book signalises a new way of theory building in the field of adult and lifelong education The Life and Learning of Korean Artists and Craftsmen Rhizoactivity conceptualises Adult learning in terms of postmodern and lifelong learning conditions Life histories as a method of researching lifelong learning The four facets of artistic journeys escaping creating controlling and formalizing This book will interest researchers focusing on lifelong and adult education Its use of social theories in its study of lifelong learning amongst Korean artists will also interest sociologists and educators concerned with the sociology of education *The Gene Editors* Louisa Ghevaert,2024-03-28 Whilst *The Gene Editors* is written through the eyes of a fictional character it is based on the cumulative result of 4 years independent research into biotechnology genetics and genomics the creation of the world s first gene edited babies infectious diseases and the origins impact and legacy of the Covid 19 pandemic *Having Their Say* Kristie Bunton,2021-04-16 After Natalie Maines of The Dixie Chicks expressed her opposition to the Iraq War and President Bush in a country music concert she was told to shut up and sing When NFL player Colin Kaepernick protested police brutality by kneeling during the national anthem he was applauded by some and demonized by others Both had their careers irrevocably altered by speaking out for their beliefs This book examines the ethical issues that arise when famous people speak out on issues often unrelated to the performances that brought those figures to public attention It analyzes several celebrity speakers singers Taylor Swift and the Chicks satirist Jon Stewart actor Tom Hanks and athletes Serena Williams Stephen Curry Colin Kaepernick and Naomi Osaka and demonstrates that justifiable speaking requires celebrity speakers journalists and audiences to consider ethical issues regarding platform intent and harm Celebrity speakers must exercise ethical care in a digital world where audiences equate celebrity status with authority and expertise about public issues Finally this book considers how people who are not famous can understand their ethical responsibilities for speaking out about public issues in their own spheres of influence

of Ordinary Life William L. Randall,2015-08-20 Our everyday lives are enmeshed in storytelling the stories we tell about our memories the people we know and the world we inhabit those we tell about our families and communities and the narratives we encounter in books movies and television Narrative structures how we view ourselves and everything around us In The Narrative Complexity of Ordinary Life William L Randall shows how concepts central to the study of narrative psychology such as narrative development and the interrelation between narrative and identity cognition and development are integral to everyday life He makes the case that all people function as narrative psychologists by continually storying their lives in memory and imagination as well as speculating on the stories that others may be living a process that Randall refers to as storyotyping Relying heavily on narrative Randall draws from experiences in his own life to illustrate various concepts in narrative psychology His inquiry leads him to the topics of gossip rumor and the narrative complexity of nostalgia In doing so he makes the case that all people function as narrative psychologists by continually storying or cementing their lives in memory and imagination a process Randall refers to as storyotyping
