Wildlife Abstracts ,1976 Field Guide to the Birds of Madagascar and the Indian Ocean Islands Roger Safford,Adrian Skerrett, Frank Hawkins,2019-12-12 This major new field guide covers Madagascar and the Indian Ocean islands including the Seychelles Comoros and Mascarenes Mauritius Reunion and Rodrigues The Malagasy region contains one of the most extraordinary concentrations of biodiversity in the world Its recognition as a zoogeographic region in its own right has recently been confirmed and all taxa combined the region was found to hold the second most distinct assemblage of vertebrates in the world after the Australian region despite being the smallest of them all This Helm Field Guide covers the whole of the Malagasy region which comprises the unique island of Madagascar and the various islands and archipelagos of the Indian Ocean including the Seychelles Comoros and Mascarenes Mauritius Reunion and Rodrigues Every resident and migrant species is covered in full detail with a colour distribution map for each Vagrants are also treated in detail but without maps All species are illustrated on a beautiful series of 124 colour plates with artwork from John Gale and Brian Small Conveniently the plates have been arranged so that all the key species of the various archipelagos are placed together in sections This is a major work of reference on the birds of the region and will remain the standard text for many years to come

Naturalised Birds of the World Christopher Lever,2010-01-29 This book looks at the world's naturalised successfully introduced species of bird Many species have been introduced to countries outside their natural range by people either deliberately or accidentally with varied consequences for both those species themselves and the native fauna of their new homes In Britain the introduced Canada Goose has quickly become ubiquitous at every lake and riverside while the Golden Pheasant remains a scarce and unobtrusive inhabitant of a few scattered remote woodlands The House Sparrow and Common Starling both in decline over parts of their native range are thriving in a naturalised state in North America and elsewhere in the world Naturalised populations of Mallard in various parts of the world are threatening a total of seven other duck species with extinction through hybridisation This book discusses each species in turn describing how why when and where its introduction took place how it became established and the ecological and economic impacts its presence has had in the country or countries it is naturalised in Each account has a map showing natural and introduced range and there is a wealth of beautiful line drawings of the species concerned **Adult Neurogenesis: Beyond Rats and Mice** Luca Bonfanti,Irmgard Amrein,2019-02-11 Researchers working on adult neurogenesis have focused largely on inbred laboratory

rodents While this provides a strong advantage of restricting genetic variation in the group it also narrows our perspective on adult neurogenesis as a biological phenomenon Many unsolved issues and open questions cannot be resolved without the contribution of comparative studies spanning through widely different species how did adult neurogenesis evolve what is the link between adult neurogenesis and brain complexity how do adult neurogenesis and animal behavior influence each other how does adult neurogenesis contribute to brain plasticity cognition and possibly repair and how do experimental conditions affect adult neurogenesis The main message from the comparative approach to adult neurogenesis is that the relative exclusive focus on laboratory rodents can result in a bias on how we think about this biological process

The Carrier Dove, 1886 *Pigeons and Doves* David Gibbs, 2010-06-30 This volume is dedicated to the field identification of pigeons and doves and it incorporates much recent information on the family Pigeons and doves are a large family of birds occurring throughout the world Many species are specialist frugivores while others feed on seeds Most are arboreal and the tropical species in particular are often brightly coloured The family includes gregarious migratory species as well as shy ground dwelling forms such as the exotic crowned pigeons of New Guinea
