The Limits of Reform Jennifer G. Schirmer, 1982-01-01 Mothers of a New World Seth Koven, Sonya Michel, 2013-10-31

Historians of Australia Germany Great Britain Sweden and the United States provide a sweeping view of the scope of women's work and make comparisons across societies and over time *Regulating the Lives of Women* Mimi Abramovitz, 1996 This important book looks at the changes in AFDC Social Security and Unemployment Insurance and welfare reform This new edition reveals how welfare policy scapegoats women more than ever to justify widespread retrenchment and to divert the public's attention from the real causes of the nation's mounting economic woes *Paradoxes of Gender* Judith Lorber, 1994-01-01 In this pathbreaking book a well known feminist and sociologist who is also the Founding Editor of *Gender* why transvestites transsexuals and hermaphrodites do not affect the conceptualization of two genders and two sexes in Western societies why most of our cultural images of women are the way men see them and not the way women see themselves why all women in modern society are expected to have children and be the primary caretaker why domestic work is almost always the sole responsibility of wives even when they earn more than half the family income why there are so few women in positions of authority when women can be found in substantial numbers in many occupations and professions why women have not benefited from major social revolutions Lorber argues that the whole point of the gender system today is to maintain structured gender inequality to produce a subordinate class women that can be exploited as workers sexual partners childbearers and emotional nurturers Calling into question the inevitability and necessity of gender she envisions a society structured for equality where no gender racial ethnic or social class group is allowed to monopolize economic educational and cultural resources or the positions of power The Feminization of Poverty Gertrude Schaffner Goldberg, Eleanor Kremen, 1990-11-09 This comprehensive and carefully organized collection provides an overview of the relationship between gender and economic stratification in seven industrialized countries Everywhere as a Polish commentator notes men have too much power and women too much work Nevertheless these studies reveal large differences in the circumstances of women in different countries and help to illuminate the several developments in the labor market the family and public policy which explain the extreme feminization of poverty in the United States Frances Fox Piven City University of New York Lucid careful and systematic the book builds a compelling explanation for the needless impoverishment experienced by millions of American women and offers a sensible realistic agenda for its reduction Michael B Katz University of Pennsylvania This study asks whether the feminization of poverty the tendency of women and their families to become the majority of the poor is unique to the United States where the phenomenon was first discovered Seven industrialized nations both capitalist and socialist with different degrees of commitment to social welfare are compared Canada Japan France Sweden Poland the Soviet Union and the United States In each of the countries the authors analyze information about women labor market conditions equalization policies social welfare programs and demographic variables

such as the rates of divorce and single parenthood According to Goldberg and Kremen it is possible to predict the feminization of poverty when three conditions are present 1 insufficient efforts to reduce work place and wage inequities for women 2 the absence or ineffectiveness of social welfare programs which can redress the cost both economic and personal of the dual role that women have assumed in industrialized societies and 3 the presence of increasing rates of divorce and single motherhood An array of labor market and social welfare programs in use in the six other industrialized nations are then reviewed by the authors for possible adaptation in the United States This important work will be a valuable resource for scholars across the academic and professional disciplines of political science sociology economics social work and women s studies

For Crying Out Loud Diane Dujon, Ann Withorn, 1996 Brings together the words of welfare mothers activists and advocates as well as scholars in a poignant and powerful challenge to the impoverishment of women **Routledge Library**

Editions: Women and Politics Various, 2021-06-23 Routledge Library Editions Women and Politics 9 Volume set presents titles originally published between 1981 and 1993 The set draws attention to the importance of women and how their presence and active involvement in politics and related fields during the twentieth century has been crucial throughout the world

Women, the State, and Welfare Linda Gordon, 2012-11 A collection of essays about women and welfare in America this book discusses how welfare programmes affect women and how gender relations have influenced the structure of such programmes Issues such as race and class are also discussed **Gender and the Life Course** Alice Rossi, 2018-01-16

Gender and the Life Course is an interdisciplinary collection of essays on the lives of women and men as they are affected by history culture demography economic and political stratification and the biopsychological processes that attend maturation and aging The book covers three major topics Part I which examines gender and the life course in broad historical perspective includes a summary of recent work in biological ecology and primatology and an analysis of the persistence of cultural and gender differences in role organization in societies undergoing the transition from agrarianism to industrialism Other essays trace the changes in sources of household income of industrial workers over the life span and review temporal and gender differences in life span transitions Part II examines gender differentiation in a variety of contexts psychological psychobiological and sociological Alice Rossi s ASA Presidential Address reviews recent work on fathering and mothering and argues that sociological explanations of such gender differences need supplementation by concepts from evolutionary theory and the neurosciences Three essays deal with gender and economy one shows how gender stratification took hold in the early stages of industrialization in France another demonstrates the persistence of gender stratification in modern economies the third focuses on ideology in relation to gender and political power Part III examines various aspects of the aged in contemporary society including an argument for an interpretive social science that uses diverse methods to improve our ability to describe and interpret many facets of the lives of elderly men and women a review of the methodology used to study changes in the aged population over time and an overview of existing data sets that permit further cohort and

longitudinal analyses of the aged The final essays review social policies as they affect the elderly with particular attention to the fact that most very old people are women and the impact of the greatly expanded life course for family and kin relations Gender and the Life Course is a state of the art assessment of the best work currently being done on gender and age a s maturational factors and is essential reading for anyone interested in adult development and gender roles Women and the State Anne Showstack Sassoon, 2018-12-19 In the late 1980s despite the fact that the vast majority of women now had a dual role in paid work and in the domestic realm the world of work the welfare state and the domestic sphere were all still organized as though women s place were primarily in the home Though this contradiction most directly affected women it had implications for the lives of both sexes and in a much wider social context Women s changing role had paralleled a major restructuring of the economy but the importance of these changes was barely reflected in contemporary political discussions or in political science or social policy literature In this title originally published in 1987 articles from women in Italy France Denmark Norway the US and Britain bring the issues sharply into focus Applying fresh perspectives they widen and enrich the debate This book marks a powerful contribution to a new and more realistic assessment of women s dual role in the state and the economy which should be read by all those concerned with the development of women s issues and with women s studies Sexual Subordination and State Intervention R. Amy Elman, 1996 One of the foremost Brazilian philosophers of education presents some of his ideas focusing on people their actions and their consciousness He begins with the premise that human history is the product of people s struggle against inequality which he describes in terms of a dialectic of oppositions and a pedagogy of consciousness Dialectics for Gadotti is both a means of inquiry and the textual and dynamic foundation of human and cultural evolution Annotation copyright by Book News Inc Portland OR **From Contention to Democracy** Marco Giugni, Doug McAdam, Charles Tilly, 1998 From Contention to Democracy addresses a crucial aspect of contemporary societies the role of social movements for political and social change The volume gathers together essays written by prominent social theorists who have been asked to reflect on the relationship between movements and processes of social political and cultural change Three broad types of movement change nexus are distinguished and discussed incorporation transformation and democratization The chapters in this book all point to the place of social movements in relation to these three processes of change while discussing the history and well known events of social movements Individual occurrences such as the protest of French students in 1968 or Chilean shantytown dwellers are examined The final essay looks ahead wondering what is the future of social movements *Journal of Sociology and Social Welfare*, 1983 Includes unpublished papers presented at the Division s meetings **Women, Politics and Change** Louise A. Tilly, Patricia Gurin, 1990-06-21 Women Politics and Change a compendium of twenty three original essays by social historians political scientists sociologists psychologists and anthropologists examines the political history of American women over the past one hundred years Taking a broad view of politics the contributors address voluntarism and collective action women s entry into

party politics through suffrage and temperance groups the role of nonpartisan organizations and pressure politics and the politicization of gender Each chapter provides a telling example of how American women have behaved politically throughout the twentieth century both in the two great waves of feminist activism and in less highly mobilized periods The essays are unusually well integrated not only through the introductory material but through a similarity of form and extensive cross references among them in raising central questions about the forms bases and issues of women s politics as well as change and continuity over time Tilly Gurin and the individual scholars included in this collection have provided us with a survey of the latest research and an agenda for the future Contemporary Sociology This book is a necessary addition to the scholar s bookshelf and the student s curriculum Cynthia Fuchs Epstein professor of sociology City University of New York Graduate Center

Gaining Ground Charles Lockhart, 2023-04-28 This book examines the challenges of aligning American social programs with the nation s deeply ingrained values of individualism self reliance and responsibility particularly when addressing poverty and other social hazards Public social provision in the United States faces a paradox while the necessity of programs like social security is broadly accepted there is widespread skepticism toward initiatives that appear to relieve individuals of personal accountability Influential critics such as Charles Murray in *Losing Ground* argue that many programs since the 1960s have undermined personal responsibility and discipline fostering dependency rather than self improvement This criticism reflects broader cultural tensions as Americans simultaneously recognize the need for collective action to mitigate risks like aging or illness while clinging to ideals of independence and merit based rewards The thesis presented here is that social programs in the United States can gain broader acceptance and effectiveness by being tailored to resonate with these core values Using the successful example of social security which links benefits to individual contributions the book proposes an investments model that ties public assistance to recipients constructive efforts This approach emphasizing earned benefits rather than handouts offers a framework for redesigning social programs to better address poverty while respecting cultural ideals By examining key programs such as Aid to Families with Dependent Children AFDC Medicare and social security the analysis highlights opportunities for reform that balance the fulfillment of socioeconomic rights with the political and cultural realities of American society While this approach cannot eliminate systemic inequities or transform dreary jobs into fulfilling work it provides a pathway for reducing suffering and fostering greater alignment between public policy and American values This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1989

Growing Old in America Beth Hess, 2020-03-02 Modern industrial societies are characterized by long term declines in fertility and steady increases in life expectancy Together these trends result in an aging population The United States is no exception since 1969 the median age has risen from 29.4 to a projected 36.4 in the year 2000 This fourth edition of the standard reader on the sociology of aging has been completely revised with 90 percent new material to reflect new information and new issues in this rapidly developing field Students and practicing professionals will find it a lively accessible overview *Harvard Women's Law Journal*, 1988 **The Socialist Register** John Saville, 1989
