Stanford, Henry T. Bunn,2001-06-14 When why and how early humans began to eat meat are three of the most fundamental unresolved questions in the study of human origins Before 2 5 million years ago the presence and importance of meat in the hominid diet is unknown After stone tools appear in the fossil record it seems clear that meat was eaten in increasing quantities but whether it was obtained through hunting or scavenging remains a topic of intense debate This book takes a novel and strongly interdisciplinary approach to the role of meat in the early hominid diet inviting

well known researchers who study the human fossil record modern hunter gatherers and nonhuman primates to contribute chapters to a volume that integrates these three perspectives Stanford s research has been on the ecology of hunting by wild chimpanzees Bunn is an archaeologist who has worked on both the fossil record and modern foraging people This will be a reconsideration of the role of hunting scavenging and the uses of meat in light of recent data and modern evolutionary theory There is currently no other book nor has there ever been that occupies the niche this book will create for itself **The Meat Eaters** Michael Collins,1992 **Meat Eater** Steven Rinella,2013-09-10 Revelatory With every chapter you get a history lesson a hunting lesson a nature lesson and a cooking lesson Meat Eater offers an overabundance to savor The New York Times Book Review Steven Rinella grew up in Twin Lake Michigan the son of a hunter who taught his three sons to love the natural world the way he did As a child Rinella devoured stories of the American wilderness especially the exploits of his hero Daniel Boone He began fishing at the age of three and shot his first squirrel at eight and his first deer at thirteen He chose the colleges he went to by their proximity to good hunting ground and he experimented with living solely off wild meat As an adult he feeds his family from the food he hunts Meat Eater chronicles Rinella s lifelong relationship with nature and hunting through the lens of ten hunts beginning when he was an aspiring mountain man at age ten and ending as a thirty seven year old Brooklyn father who hunts in the remotest corners of North America He tells of having a struggling career as a fur trapper just as fur prices were falling of a dalliance with catch and release steelhead fishing of canoeing in the Missouri Breaks in search of mule deer just as the Missouri River was freezing up one November and of hunting the elusive Dall sheep in the glaciated mountains of Alaska Through each story Rinella grapples with themes such as the role of the hunter in shaping America the vanishing frontier the ethics of killing the allure of hunting trophies the responsibilities that human predators have to their prey and the disappearance of the hunter himself as Americans lose their connection with the way their food finds its way to their tables Hunting he argues is intimately connected with our humanity assuming responsibility for acquiring the meat that we eat rather than entrusting it to proxy executioners processors packagers and distributors is one of the most respectful and exhilarating things a meat eater can do A thrilling storyteller with boundless interesting facts and historical information about the land the natural world and the history of hunting Rinella also includes after each chapter a section of Tasting Notes that draws from his thirty plus years of eating and cooking wild game both at home and over a campfire In Meat Eater he paints a loving portrait of a way of life that is part of who we are as humans and as Americans
