

The Melody Of Speaking 1787

Henry G. Bohn, William T. Lowndes

The Melody Of Speaking 1787:

The Melody of Speaking, 1787 John Walker, 1970 **The Melody of Speaking** Walker, 1787 *The Oxford Handbook of British Poetry, 1660-1800* John T. Lynch, 2016 In the most comprehensive up to date account of the poetry published in Britain between the Restoration and the end of the eighteenth century a team of leading experts surveys the poetry of the age in all its richness and diversity They provide a systematic overview and restore these poetic works to a position of centrality in modern criticism *Rhetorical Delivery as Technological Discourse* Ben McCorkle, 2012-01-19 According to Ben McCorkle the rhetorical canon of delivery traditionally seen as the aspect of oratory pertaining to vocal tone inflection and physical gesture has undergone a period of renewal within the last few decades to include the array of typefaces color palettes graphics and other design elements used to convey a message to a chosen audience McCorkle posits that this redefinition while a noteworthy moment of modern rhetorical theory is just the latest instance in a historical pattern of interaction between rhetoric and technology In *Rhetorical Delivery as Technological Discourse A Cross Historical Study* McCorkle explores the symbiotic relationship between delivery and technologies of writing and communication Aiming to enhance historical understanding by demonstrating how changes in writing technology have altered our conception of delivery McCorkle reveals the ways in which oratory and the tools of written expression have directly affected one another throughout the ages To make his argument the author examines case studies from significant historical moments in the Western rhetorical tradition Beginning with the ancient Greeks McCorkle illustrates how the increasingly literate Greeks developed rhetorical theories intended for oratory that incorporated writerly tendencies diminishing delivery's once prime status in the process Also explored is the near eradication of rhetorical delivery in the mid fifteenth century the period of transition from late manuscript to early print culture and the implications of the burgeoning print culture during the nineteenth century McCorkle then investigates the declining interest in delivery as technology designed to replace the human voice and gesture became prominent at the beginning of the 1900s Situating scholarship on delivery within a broader postmodern structure he moves on to a discussion of the characteristics of contemporary hypertextual and digital communication and its role in reviving the canon while also anticipating the future of communication technologies the likely shifts in attitude toward delivery and the implications of both on the future of teaching rhetoric *Rhetorical Delivery as Technological Discourse* traces a long view perspective of rhetorical history to present readers a productive reading of the volatile treatment of delivery alongside the parallel history of writing and communication technologies This rereading will expand knowledge of the canon by not only offering the most thorough treatment of the history of rhetorical delivery available but also inviting conversation about the reciprocal impacts of rhetorical theory and written communication on each other throughout this history *Essays on the Eighteenth-Century English Stage* Kenneth R. Richards, Peter Thomson, 2020-01-08 The eighteenth century produced more inventive actors than fine dramatists and it displayed its actors

to increasing advantage as theatre management became more expert and stage design more ambitious First published in 1972 the eleven papers collected in *The Eighteenth Century English Stage* originally read at a Manchester University Symposium in July 1971 follow this historical emphasis Two papers are centred on dramatists four on actors three on managers and two on designers Malcolm Kelsall analyses Steele's debt to Terence using his classical scholarship as illuminatingly as Edgar Roberts uses his musical scholarship in writing about the songs in Fielding's plays George Taylor compares and evaluates a number of theories of acting and speculates on the likely relevance of the best known books on rhetoric whilst Kathleen Barker Arnold Hare and David Rostron consider the work of individual actors Powell Cooke and John Kemble Theatre managers are represented by John Rich in Paul Sawyer's sympathetic account Thomas Harris who is given new life in the recent researches of Cecil Price and Stephen Kemble fixed by Kenneth Robinson in canny control of the Newcastle theatre circuit Finally Graham Barlow reaches some controversial conclusions about the dimensions of the Theatre Royal Drury Lane by subjecting Thornhill's sketches to a practising designer's statistical examination and Sybil Rosenfeld carries a stage further her pioneering work on eighteenth century scene painting and design The two last are attractively illustrated by 8 pages of plates This book's particular value lies in its bringing together several simply presented but deeply informed explorations of often neglected aspects of the eighteenth century theatre The papers with their general sense of enthusiasm and concern for their subject will interest all students of the eighteenth century and theatre enthusiasts in particular
