Sea in Medieval England** Richard Gorski,2012 A fresh assessment of seaborne activity around England in the later middle
ages offering a fresh perspective on its rich maritime heritage England s relationship with the sea in the later Middle Ages
has been unjustly neglected a gap which this volume seeks to fill The physical fact of the kingdom s insularity made the seas
around England fundamentally important to its development within the British Isles and in relation to mainland Europe At
times they acted as barriers but they also and more often served as highways of exchange transport and communication and
it is this aspect which the essays collected here emphasise Mindful that the exploitation of the sea required specialist
technology and personnel and that England s maritime frontiers raised serious issues of jurisdiction security and
international diplomacy the chapters explore several key roles performed by the sea during the period c 1200 c 1500
Foremost among them is war the infrastructure logistics politics and personnel of English seaborne expeditions are assessed
most notably for the period of the Hundred Years War What emerges from this is a demonstration of the sophisticated but not
infallible methods of raising and using ships men and material for war in a period before England possessed a permanent
navy The second major facet of England s relationship with the sea was the generation of wealth this is addressed in its own
right and as an intrinsic aspect of warfare and piracy RICHARD GORSKI is Philip Nicholas Memorial Lecturer in Maritime
