The Metaphysics Of Self And World Towards A Humanistic Philosophy

Donald A. Crosby

The Metaphysics Of Self And World Towards A Humanistic Philosophy:

The Metaphysics of Self and World Elie Maynard Adams, 1991 A great fissure occurred in Western civilization in the early modern period with the divorce between the humanities and the sciences and the rise of scientific naturalism The Metaphysics of Self and World is a philosophical exploration of the relationship between the individual the culture and the world It is in the author's words a philosophy of the humanities a philosophy of humanity and a philosophy of social reality It explores the implications of a world view that would integrate the perspective of the sciences with humanistic ways of thought E M Adams claims that we do violence to ourselves as human beings by trying to fit into the world as delineated in scientific categories Rejecting cultural subjectivism and scientific naturalism he argues for the irreducibility and validity of the categories of the humanities and for a fully developed humanistic philosophy of self and world In generating this world view he utilizes the humanities as a source of culture therapy in order to close the fissure in Western civilization Author note E M Adams is Kenan Professor of Philosophy Emeritus at the University of North Carolina Chapel Hill He has written numerous books and articles and a festschrift celebrating his work Mind Value and Culture Essays in Honor of E M Adams edited by David Weissbord was published in 1989

Religion and Cultural Freedom Elie Maynard Adams, 1993 Citing his personal quest to reconcile the contradictions among biblical religion democratic liberalism and modern science E M Adams explores the foundations of religion and its role in the culture He asks What would constitute a responsible religion in our time And he determines that for a religion to be credible its tenets must be reconcilable with scientific beliefs the historical record the accepted worldview and the creative spiritual and ethical dimensions of human experience In Religion and Cultural Freedom Adams focuses on Judeo Christian religion in Western civilization and draws on literary historical ethical and philosophical examples Maintaining that religion is logically accountable in its belief system to the culture of which it is a part he illustrates how at different points in history religious beliefs have been altered or reinterpreted in response to cultural tensions and conflicts This interplay between religion and culture is an essential part of Adams's definition of a responsible religion While he does not think that religion needs to yield to conflicting sectors in the culture he insists that it has a responsibility to work for coherence and intellectual respectability within a free culture During his discussion Adams offers a realistic theory of the language of the humanities and lived experience especially the language of value and meaning and on the basis of this theory he reconstructs the intellectual enterprise and interprets meaning and truth in religious discourse Interested in what he takes to be a negative turn in religious consciousness and the fate of religion in modern Western civilization Adams concludes that the time may be ripe for a humanistic revolution that would create a fully accountable and intellectually credible religion Author note E M Adams is Kenan Professor of Philosophy Emeritus at the University of North Carolina at Chapel Hill He has published ten previous books including The Metaphysics of Self and World Temple

Maynard Adams Glenn Blackburn, 2009 Maynard Adams 1919 2003 was a profound philosopher and civic

humanist at the University of North Carolina Chapel Hill A major intellectual figure of the second half of the twentieth century Adams developed a comprehensive philosophy of civilization that applies to all humanity but has a distinctly Southern dimension

A Society Fit for Human Beings Elie Maynard Adams,1997-10-31 Argues for a humanistic cultural reformation to counter our materialistic values and science dominated intellectual life and shows how this would affect our lives and transform our society A Society Fit for Human Beings contends that there is a profound incoherence in the foundations of modern Western civilization and that we are on a self destructive course With the quest for wealth and power our dominant concern we find ourselves with a flourishing economy and a supreme military force based on science and technology but with our moral civic and religious culture undermined by our way of comprehending the world Our human identity is problematic the wells of meaning that nourish the human spirit are polluted or drying up and the social order is in disarray This situation E M Adams argues requires nothing less than a historic cultural revolution based on a shift in priorities from wealth and power to humanistic values those grounded in selfhood and lived experience that are essential for human growth meaningful lives and a healthy society Such a shift in our governing values would require a restructuring of our intellectual vision of humankind and the world in terms of humanistic categories This book shows the import of such a humanistic cultural revolution for our human identity morality the social order and our major institutions including the family and community education the economy the government the military and religion It outlines how we can work toward such a cultural revolution and develop a constructive postmodern civilization with a society fit for human beings

American Philosophy: An Encyclopedia John Lachs,Robert B. Consciousness and Freedom Donald A. Crosby,2017-08-29 Questions relating to human freedom cannot be separated from questions relating to human consciousness The two are intricately entwined and neither can be understood apart from the other There is a widespread assumption today that we can understand the nature of human freedom even though there is an equally widespread acknowledgment that we have a lot yet to learn about the nature of human consciousness and its

relations to the human body This separation of the two issues is false Attempts to prove it have failed and will continue to fail so long as the concept of freedom in its intimate connections with the nature of consciousness is not properly understood The kind of genuine freedom of thought and action defended in this book lies at the heart of responsible outlooks on our individual and social lives our hopes for the future the whole of our history as human beings and our relations to the natural world

Necroclimatism in a Spectral World (Dis)order? Artwell Nhemachena, Munyaradzi Mawere, 2019-06-25 Highlighting the problematiquess of working with a narrow version of greenhouse effects or global warming this book posits the theory of necroclimatism that encompasses broader versions of greenhouse effects and global warming Conceiving cultures societies moral sensibilities epistemologies politics economies legal systems and religions of the formerly colonised peoples as greenhoused and entrapped in the heat of global apartheid and neo colonialism the book refuses to be confined to the pufferies of physical conceptualisations of greenhousing and global warming Underlining the supposed disposability and dispensability of colonised peoples the notion of necroclimatism explicates ways in which some people suffer various forms of death which have increasingly become a feature of global apartheid and neo colonialism that are cast in spectral sacrificial logics Deemed to constitute disposable bodies disposable cultures disposable politics disposable societies disposable epistemologies disposable religions disposable laws and disposable economies the sacrificed are in the age of climate catastrophism once again reminded that they have duties to die to become extinct in order to save the global spaceship that is sinking due to climate change and global warming This book therefore argues that in a sacrificial world dis order binaries between humans and animals good and evil moral and immoral the dead and the living necessarily vanish in the nefarious logic of what marks the era of climate catastrophism and the attendant necroclimatism The book further argues that a sacrificial world dis order is necessarily a posthumanist and postanthropocentric world dis order which should be never granted space in African worlds and even beyond The book thus raises fundamental questions for African anticipatory regimes and for this reason it is handy for scholars in political science sociology social anthropology development studies environmental studies agricultural studies legal studies food science geography religious studies and decolonial fields of studies
