Night Skies of Aboriginal Australia Dianne Johnson,2014-02-19 Written by anthropologist Diane Johnson Night Skies of Aboriginal Australia has been in demand since its publication in 1998 It is a record of the stars and planets which pass across night time

A History of Modern Planetary Physics Stephen G. Brush,1996-04-26 Where did we come from Before there was life there had to be something to live on a planet a solar system During the past 200 years astronomers and geologists have developed and tested several different theories about the origin of the solar system and the nature of the Earth Did the Earth and other planets form as a by product of a natural process that formed the Sun Did the solar system come into being as the result of catastrophic encounter of two stars Is the inside of the Earth solid liquid or gaseous The three volumes that make up A History of Modern Planetary Physics present a survey of these theories Nebulous Earth follows the development of the nineteenth century s most popular explanation for the origin of the solar system Laplace s Nebular Hypothesis This theory supposes that a flattened mass of gas extending beyond Neptune s orbit cooled and shrank throwing off in the process successive rings that in time coalesced to form several planets

When the Earth Was Flat Dirk L. Couprie,2018-11-01 This book is a sequel to Heaven and Earth in Ancient Greek Cosmology Springer 2011 With the help of many pictures the reader is introduced into the way of thinking of ancient believers in a flat earth The first part offers new interpretations of several Presocratic cosmologists and a critical discussion of Aristotle s proofs that the earth is spherical The second part explains and discusses the ancient Chinese system called gai tian The last chapter shows that inadvertently ancient arguments and ideas return in the curious modern flat earth cosmologies

Unveiling Galaxies Jean-René Roy,2018 A thought provoking study of the powerful impact of images in guiding astronomers understanding of galaxies through time

Cosmology, History, and Theology Wolfgang Yourgrau,2012-12-06 It is difficult to doubt that we suffer at present from the manifold aspects of an economic crisis which affects all walks of life Well men in almost every

epoch in history have maintained that they were going through a crisis which was supposed to be always more grave than any preceding critical phase. Very often those crises were not of an economic nature but concerned either health, the political structure, the opportunity of acquiring knowledge and so on. I think that we would consider today that some of those claims that were made in various historical epochs were often exaggerated if viewed from a historical point of view. However, it seems undeniable that we at present are in the middle of a universal economic crisis which has affected almost every facet of our daily life. And yet the fact that despite these adverse conditions it is still possible to gather scholars from all corners of the world to deal with often sheer theoretical and sometimes abstract pursuits is a refutation of any facile pessimism. It is reassuring to all who wonder where political and social events are taking us. Our salvation may well come from those acts of the mind so characteristic of the pure scientist and scholar.
