The Mind Behind The Musical Ear How Children Develop Musical Intelligence:

The Mind Behind the Musical Ear Jeanne Shapiro Bamberger, 1991 Bamberger focuses on the earliest stages in the development of musical cognition Beginning with children s invention of original rhythm notations she follows eight year old Jeff as he reconstructs and invents descriptions of simple melodies *The Mind Behind the Musical Ear* Jeanne Shapiro Bamberger, 1995

Discovering the musical mind Jeanne Bamberger, 2013-10-10 Following her distinguished earlier career as a concert pianist and later as a music theorist Jeanne Bamberger conducted countless case studies analysing musical development and creativity the results of which were published in important scientific journals Discovering musical mind draws together in one source these classic studies offering the chance to revisit and reconsider some of her conclusions Reviewing the data in light of current theories of cognitive development she discusses how some of the conclusions she drew stand up to scrutiny whilst in other cases anomalies turn out to have greater significance than expected The book is a collection of Bamberger s papers from 1975 to 2011 It includes her first study of Beethoven s original fingerings her beginning work with children s invented notations close observations and analysis of children in the Laboratory for Making Things studies of musically gifted children and the emergent musical development of students in elementary secondary school and university undergraduate and graduate studies The observations and research lead to the development of an interactive computer based music environment that uses her pragmatic theory of musical development as the basis for a project oriented program for teaching and learning Unlike other collections the book is both interdisciplinary and strongly practical It brings together and integrates Bamberger s background in music theory research in music perception and music education performance cognitive development artificial intelligence and procedural music composition Her multi faceted approach to music theory and music pedagogy is guided throughout by her commitment to an understanding and respect for an individual s natural creative musical intelligence This natural competence becomes the formative ground on which to help people of all ages build an ever growing understanding and engagement with the evolving structures of the world s music Bringing together a body of research currently scattered across a range of journals or simply no longer available the book will make fascinating reading for those in the fields of musical developmental and educational psychology

Child and Adolescent Development William Damon, Richard M. Lerner, Deanna Kuhn, Robert S. Siegler, Nancy Eisenberg, 2012-06-29 This advanced text for psychology human development

and education provides students with state of the art overviews of the discipline in an accessible affordable format Unique both in the depth of its coverage and in the timeliness of the research that it presents this comprehensive text conveys the field of child and adolescent development through the voices of scientists who themselves are now shaping the field

Teaching Music in Secondary Schools Gary Spruce,2002 This series brings together a range of articles extracts from books and reports that inform an understanding of secondary schools in today s educational climate *Learning in a Musical Key* Lisa M. Hess,2011-09-15 Learning in a Musical Key examines the multidimensional problem of the relationship between music and theological education Lisa Hess argues that in a delightful and baffling way musical learning has the potential to significantly alter and inform our conception of the nature and process of theological learning In exploring this exciting intersection of musical learning and theological training Hess asks two probing questions First What does learning from music in a performative mode require Classical modes of theological education often founder on a dichotomy between theologically musical and educational discourses It is extremely difficult for many to see how the perceivedly nonmusical learn from music Is musicality a universally human potential In exploring this question Hess turns to the music learning theory of Edwin Gordon which explores music s unique mode of teaching learning its primarily aural oral mode This challenge leads to the study s second question How does a theologian in the disciplinary sense integrate a performative mode into critical discourse Tracking the critical movements of this problem Hess provides an inherited transformational logic as a feasible path for integrating a performative mode into multidimensional learning This approach emerges as a distinctly relational embodied multidimensional and non correlational performative mode theology that breaks new ground in the contemporary theological landscape As an implicitly trinitarian method rooted in the relationality of God this non correlational method offers a practical theological contribution to the discipline of Christian spirituality newly claimed here as a discipline of transformative teaching learning through the highly contextualized and self implicated scholar into relationally formed communities and ultimately into the world *The Art of Teaching Music* Estelle R. Jorgensen,2024-06-06 The Art of Teaching Music takes up important aspects of the art of music teaching ranging from organization to serving as conductor to dealing with the disconnect between the ideal of university teaching and the reality in the classroom Writing for both established teachers and instructors on the rise Estelle R Jorgensen opens a conversation about the life and work of the music teacher The author regards music teaching as interrelated with the rest of lived life and her themes encompass pedagogical skills as well as matters of character disposition value personality and musicality She reflects on musicianship and practical aspects of teaching while drawing on a broad base of theory research and personal experience Although grounded in the practical realities of music teaching Jorgensen urges music teachers to think and act artfully imaginatively hopefully and courageously toward creating a better world **PSYCHOLOGICAL FOUNDATIONS OF MUSICAL BEHAVIOR** Rudolf E. Radocy,J. David Boyle,2012-09-01 The fifth edition of Psychological Foundations of Musical Behavior
