The Mind Into The Inner World The Human Body:

In the Mind, in the Body, in the World Douglas Cairns, Douglas L. Cairns, Curie Virág, 2024 This volume is the result of a three year collaboration funded by the American Council of Learned Societies and the British Academy between scholars of early China and of ancient Hellenistic Greece to investigate the emergent discourses of emotions in philosophy medicine and literature from around the fifth century BCE to the second century CE It brings together scholars working on the history and philosophy of emotions in the two ancient traditions and with different areas of expertise to investigate the emotions and their conceptualization at a crucial period in the cultural and intellectual development of both cultures The project was motivated by a desire to make an intervention in the existing scholarship on emotions in both fields which stands to benefit from a greater methodological self awareness about the category of emotions and the kinds of commitments it entails The volume aims to explore how the tools of cross cultural and cross disciplinary investigation might be deployed to advance our understanding of the emotions in the two ancient societies and to use that understanding as a contribution to current research on the emotions more generally

The Human Mind Valentin Matcas, 2014-10-16 It is nice to learn how mysterious and complex the human mind is who discovered the synapse when in what specific university and what everyone was doing that day but what you really want to know is how your mind functions how you reason how you have your feelings and ideas and how your mind affects you in every detail You want to know exactly what happens in your mind when you watch the painting of Renoir with the beautiful woman wearing the white dress and playing the grand piano and why it makes you enjoy a beautiful moment then compared to watching sofas and armchairs You want to know all details related to how a simple yellow car on the road can remind you of your best friend and of all the loving moments that you once had through what cognitive mechanisms it happens and even more you want to know why it reminds you of your friend sometimes while other times it associates with work rain and shopping How exactly does the mind know all these Since it is interesting as it happens while it remains at an unconscious level and you just cannot find out how it takes place in order to be able to control it and use it whenever you desire You want to know exactly how you are able to predict the displacement of a tennis ball in order to hit it perfectly in an instant giving its exact speed direction and angular momentum necessary to win and doing so long before your conscious mind even perceives the ball How can your subconscious do so without your conscious mind while the conscious mind should be more capable and therefore better prepared according to science What is the exact cognitive mechanism Because if you can only know it all your strategies in life can become flawless You want to know exactly how your mind is able to solve advanced mathematical problems and how it retrieves on its own the proper knowledge in order to perform very abstract operations How does everything happen How do you have your ideas in mathematics business and art What is the human creativity and how can the human mind achieve it at will and in all domains What exactly makes your brain perform better or worse under all circumstances and why exactly is reasoning different in

everybody How do you perform abstract thinking How do you imagine How exactly does your mind generate plans and strategies related to important future events How do you comprehend and enjoy various topics in psychology literature mathematics art and music How do you love How does everything happen within your mind brain and the entire organism Because this is of interest this is what you want to know while this is what you actually need in life since without these you cannot understand your mind the extraordinary human mind And since your mind and reasoning integrate you in life and in the world now you cannot understand yourself life the world and your place and meaning in life and in the world without understanding the human mind along with the human reasoning While it is meaningful to know these well otherwise you end up doing everything else instead of reasoning accurately developing entirely and behaving adequately in life and in the world Since ignorance always harms the world while now it even has its own cause the lack of accurate knowledge about the human mind Throughout this book we create a comprehensive mental model for the human mind including its structure abilities development interconnectivity reasoning and further meanings allowing you to understand yourself and your entire cognition If you want to understand the human mind in all its meaningful details this book is for you *The Body, Self-Cultivation, and Ki-Energy* Yasuo Yuasa,1993-01-01 This book is an inquiry into ki energy its role within Eastern mind body theory and its implications for our contemporary Western understanding of the body Yuasa examines the concept of ki energy as it has been used in such areas as acupuncture Buddhist and Taoist meditation and the martial arts To explain the achievement of mind body oneness in these traditions he offers an innovative schematization of the lived body His approach is interdisciplinary and cross cultural offering insights into Western philosophy religion medical science depth psychology parapsychology theater and physical education To substantiate the relationship that ki energy forms between the human body and its environment Yuasa introduces contemporary scientific research on ki energy in China and Japan as well as evidence from acupuncture medicine and from the experience of meditators and martial arts practitioners This evidence requires not only a rethinking of the living human body and of the mind body and mind matter relation but also calls into question the adequacy of the existing scientific paradigm Yuasa calls for an epistemological critique of modern science and explores the issue of the relation of teleology to science *The Human Origins* Valentin Matcas,2016-04-20 There is more to the human origins development intelligence and civilization than the epic debate Creationism versus Evolution simply because there is more to the human condition than what authorities and ideologies want you to believe Therefore when you study the human origins you have to search beyond the moment when the first humans had detached from the firmament or previous species since there are other significant events in humanity s lifespan and achievement defining its specific timeline While you have to study everything otherwise you risk understanding these significant events only from simplistic empirical or ideological perspectives ending up learning what you already know while following the crowd throughout unending debates Since you want the accurate truth because you already know all theories beliefs speculations and debates regarding

the human origins And this is why when you study the human origins you expect to understand everything about the origins of life the nature and origins of this world the nature of the human higher self and intelligence the origins and debut of the human consciousness and human intelligent reasoning along with all details related to the Creator of this entire world of Life and of humanity Additionally it is relevant to know how all these affect you personally and how they affect your family your genetic line and your nation how your family and genetic line originate where and how it happened under what circumstances and with what status and privileges for you for your family for your nation and for the humankind And this is exactly what we cover throughout this book in all details and from all perspectives This book studies the human origins along with the origins of life human intelligence human species human development human society human current civilization along with various past civilizations of Earth integrating humans their origins and their original and current conditions in an elaborate comprehensive model
