Other Wind Ursula K. Le Guin, 2002-05 **Tsimshian narratives: volume 1** Marius Barbeau, William Beynon, 1987-01-01 These oral histories collected by Marius Barbeau and William Beynon from the Pacific Northwest reflect the Tsimshian relationship with the environment their understanding of the spiritual universe and their interpretation of the physical world Published in English **What Ever Happened to Orson Welles?** Joseph McBride, 2022-01-11 In this intimate and often surprising personal portrait Joseph McBride challenges the conventional wisdom that Welles's career after *Citizen Kane* widely regarded as the greatest film ever made fell into a long decline The author shows instead how Welles never stopped directing radical adventurous films and was always breaking new artistic ground as a filmmaker McBride is the first author to provide a comprehensive examination of the films of Welles's artistically rich yet widely misunderstood later period in the United States 1970-1985 when McBride knew the director and worked with him as an actor on *The Other Side of the Wind* Welles's personal testament on filmmaking To put Welles's later years into context the author reexamines the filmmaker's entire life and career This newly updated edition rounds out the story with a final chapter analyzing *The Other Side of the Wind* finally completed in 2018 and his rediscovered 1938 film *Too Much Johnson* McBride offers many fresh insights into the collapse of Welles's Hollywood career in the 1940s his subsequent political blacklisting and his long period of European exile *What Ever Happened to Orson Welles* serves as a major reinterpretation of Welles's life and work McBride's revealing portrait changes the framework for how Orson Welles is understood as a man an actor a political figure and a filmmaker

dena,EWEA,ForWind,IEO,NTUA,Senenergy,SINTEF,2011-10-01 Summary The OffshoreGrid project proves the financial benefits of building a meshed European grid offshore and outlines two cost efficient designs Contents Offshore grids connecting North and Baltic Sea wind farms and electricity consumers can be built substantially cheaper than expected Building hub connections at sea instead of using cables to connect single wind farms individually to the shore will result in lower investment costs of 14 billion Euros Additionally if these hub connections would be combined with an even more interconnected meshed grid the necessary additional costs of 7 billion Euros would be compensated by 16 to 21 billion Euros of additional benefits over 25 years of grid operation *Discourse on Method, Optics, Geometry, and Meteorology* René Descartes,2001-01-01 This volume preserves the format in which Discourse on Method was originally published as a preface to Descartes s writings on optics geometry and meteorology In his introduction Olscamp discusses the value of reading the Discourse alongside these three works which sheds new light on Descartes s method Includes an updated bibliography
