East Asia Before the West David C. Kang, 2010-10-14 From the founding of the Ming dynasty in 1368 to the start of the Opium Wars in 1841 China has engaged in only two large scale conflicts with its principal neighbors Korea Vietnam and Japan These four territorial and centralized states have otherwise fostered peaceful and long lasting relationships with one another and as they have grown more powerful the atmosphere around them has stabilized Focusing on the role of the tribute system in maintaining stability in East Asia and in fostering diplomatic and commercial exchange Kang contrasts this history against the example of Europe and the East Asian states skirmishes with nomadic peoples to the north and west Although China has been the unquestioned hegemon in the region with other political units always considered secondary the tributary order entailed military cultural and economic dimensions that afforded its participants immense latitude Europe's Westphalian system on the other hand was based on formal equality among states and balance of power politics resulting in incessant interstate conflict Scholars tend to view Europe's experience as universal but Kang upends this tradition emphasizing East Asia's formal hierarchy as an international system with its own history and character This approach not only recasts our understanding of East Asian relations but also defines a model that applies to other hegemonies outside the European order

Korea and the Evolution of the American-Australian Relationship, 1947-53 Daniel Fazio, 2023-09-29 Fazio examines the significance of the US Australian Korean engagement 1947-53 in the evolution of the relationship between the two nations in the formative years of the Cold War In the aftermath of World War Two divergent American and Australian strategic and security interests converged and then aligned on the Korean peninsula Fazio argues that the interactions between key US and Australian officials throughout their Korean engagement were crucial to shaping the nature of the evolving relationship and the making of the alliance between the two nations The diplomacy of Percy Spender John Foster Dulles and James Plimsoll was particularly crucial He demonstrates that the American evaluation of the geo strategic significance of Korea was a significant factor in the making of the ANZUS alliance and events in Korea remained central to the evolving US Australian relationship Their Korean engagement showed the US and Australia had similar and overlapping rather than identical interests and that their relationship was much more nuanced and problematic than commonly perceived Fazio challenges the Australian mythology on the origins of the ANZUS Treaty and presents a cautionary insight into the limits of Australia's capacity to influence US policy to benefit its interests An insightful read for

Comprehensive Security in Asia ,2000-04-27 The term comprehensive security was first used by the late Japanese prime minister Ohira but the concept as such can be traced back to Japanese thinking on security during the fifties Its meaning goes far beyond requirements of military defence against a particular enemy and stresses the need to take into account other aspects vital to national stability food energy environment communication and social security While not denying the importance of military security it explicitly encompasses a wide range of other aspects the search for environmental security for instance which requires cooperation with other countries including hypothetical enemies The concept stresses the need for confidence building methods as a requirement for its attainment and pertains to issues such as preventive diplomacy energy security second order cybernetics greater transparency of international financial markets as means to enhance overall stability It is a notion that goes beyond simplifications such as us and them Since the word has been first coined in Japan it has caught on in other Asian countries as well It has become clear that the concept is particularly suited for a continent where large and powerful countries such as China Korea Japan and Indonesia are unlikely to enter into close cooperation along the model of the European Union In short in this volume a team of scholars from Asia Europe and the United States provide clear analyses of issues vital to Asian politics an important contribution to one of the key issues of contemporary Asian politics
