Strolling through Florence Mario Erasmo, 2017-11-30 To walk through Florence is to step into one of the most remarkable histories of any European city From its establishment by Julius Caesar in the first century BC through its Golden Age at the epicentre of the Italian Renaissance to its position as an iconic cultural destination in the twenty first century Florence is a small city that packs a lot of punch This is the city of Dante and Boccaccio Leonardo da Vinci and Michelangelo the Medici Botticelli Donatello and the Mad Monk Savonarola Their stories permeate every corner of Florence but the city s contemporary scene is just as alluring from cutting edge art and fashion to food It is only by exploring Florence on foot that the visitor can truly experience everything the city has to offer Reliquary

Tabernacles in Fourteenth-century Italy Beth Williamson, 2020 Ground breaking study of the enigmatic and unique tabernacles from fourteenth century Italy which for the first time combined relics and images Images and relics were central tools in the process of devotional practice in medieval Europe The reliquary tabernacles that emerged in the 1340s in the area of Central Italy surrounding the city of Siena combined images and relics presented visibly together within painted and decorated wooden frames In these tabernacles the various media and materials worked together to create a powerful and captivating ensemble usable in several contexts both in procession and static as the centre of focussed prayerful attention This book looks at Siena and Central Italy as environments of artistic invention and at Sienese painters in particular as experts in experimentation whose ingenuity encouraged the development of this new form of devotional technology It is the first full length study to focus in depth on the materiality of these tabernacles investigating the connotations and effects of the materials from which they were made It examines especially the effect of bringing relics and images together and considers how the impressions of variety and abundance created by the multiplication of materials give birth to meaning and encourage certain kinds of action or thought

Public Painting and Visual Culture in Early Republican Florence George Bent, 2017-01-16 Street corners guild halls government offices and confraternity centers contained paintings that made the city of Florence a visual jewel at precisely the time of its emergence as an international cultural leader This book considers the paintings that were made specifically for consideration by lay viewers as well as the way they could have been interpreted by audiences who approached them with specific perspectives Their belief in the power of images their understanding of the persuasiveness of pictures and their acceptance of the utterly vital role that art could play as a propagator of civic corporate and individual identity made lay viewers keenly aware of the paintings in their midst Those

pictures affirmed the piety of the people for whom they were made in an age of social and political upheaval as the city experimented with an imperfect form of republicanism that often failed to adhere to its declared aspirations Sieneese Painting, from Its Origins to the Fifteenth Century Bruce Cole, 1980 This is a beautiful book which covers the history of Sieneese painting from the 13th to the 15th century Color and black and white illustrations of numerous works of art Amazon
