Brian Aldiss Michael R. Collings, 1986-01-01 A guide to Aldiss's fictional output from the 50s to the 80s *Reading by Starlight* Damien Broderick, 2005-06-29 Reading by Starlight explores the characteristics in the writing, marketing and reception of science fiction which distinguish it as a genre. Damien Broderick explores the postmodern self-referentiality of the sci-fi narrative, its intricate coded language and discursive encyclopaedia. He shows how, for perfect understanding, sci-fi readers must learn the codes of these imaginary worlds and vocabularies all the time, picking up references to texts by other writers. Reading by Starlight includes close readings of paradigmatic cyberpunk texts and writings by SF novelists and theorists including Isaac Asimov, Arthur C. Clarke, Brian Aldiss, Patrick Parrinder, Kim Stanley Robinson, John Varley, Roger Zelazny, William Gibson, Fredric Jameson and Samuel R. Delaney. Science Fiction and Fantasy Literature, 1975-1991 R. Reginald, Mary Wickizer Burgess, Daryl Furumi Mallett, 1992 Science fiction constitutes one of the largest and most widely read genres in literature and this reference provides bibliographical data on some 20,000 science fiction, fantasy and horror fiction books as well as nonfiction monographs about the literature. A companion to Reginald's Science Fiction and Fantasy Literature 1700-1974. Gale 1979, the present volume is alphabetically arranged by approximately 10,000 author names. The entry for each individual work includes title, publisher, date and place published, number of pages, hardbound or paperback format and type of book (novel, anthology, etc.). Where appropriate, entries also provide translation notes, series information, pseudonyms and remarks on special features such as celebrity introductions. Includes indexes of titles, series, awards and doubles for locating volumes containing two novels. Annotation copyright by Book News Inc, Portland, OR. Science Fiction Writers Richard Bleiler, 1999 On science fiction authors. **The Year's Best Science Fiction: Third Annual Collection** Gardner Dozois, 1986-04-15 The best gets better and bigger. Lafferty, George R. R. Martin, Frederik Pohl, Kim Stanley Robinson, Robert Silverberg, James Tiptree Jr. and Howard Waldrop. Livingston,2017-12-14 This is a study of science in Muslim society from its rise in the 8th century to the efforts of 19th century Muslim thinkers and reformers to regain the lost ethos that had given birth to the rich scientific heritage of earlier Muslim civilization The volume is organized in four parts the rise of science in Muslim society in its historical setting of political and intellectual expansion the Muslim creative achievement and original discoveries proponents and opponents of science in a religiously oriented society and finally the complex factors that account for the end of the 500 year Muslim renaissance The book brings together and treats in depth using primary and secondary sources in Arabic Turkish and European languages subjects that are lightly and uncritically brushed over in non specialized literature such as the question of what can be considered to be purely original scientific advancement in Muslim civilization over and above what was inherited from the Greco Syriac and Indian traditions what was the place of science in a religious society and the question of the curious demise of the Muslim scientific renaissance after centuries of creativity The book also interprets the history of the rise achievement and decline of scientific study in light of the religious temper and of the political and socio economic vicissitudes across Islamdom for over a millennium and integrates the Muslim legacy with the history of Latin European accomplishments It sets the stage for the next momentous transmission of science from the West back to the Arabic speaking world of Islam from the last half of the 19th century to the early 21st century the subject of a second volume **The**
