**1 Corinthians: A Social Identity Commentary** J. Brian Tucker, 2024-10-17 Paul's first letter to the Corinthians deals with key aspects of the formation of the Christian community at Corinth. Paul uses his correspondence with the Corinthians to address issues of morality, community structure, and of religious behaviour. The letter is a key document for understanding the development of Christianity and for understanding Christianity in its earliest context. In this Social Identity Commentary, J. Brian Tucker provides a comprehensive coverage of the issues and concerns related to 1 Corinthians from the perspective of social identity. Tucker outlines his interpretation of the theoretical issues concerned and then applies this to provide a clear overview of historical and critical issues related to the study of 1 Corinthians. This provides a clear engagement with the text that will serve as a useful resource for scholars, students, clergy, and people interested in the formation and purpose of the letter.

*Noninvasive Vascular Diagnosis* Ali F. AbuRahma, John Bergan, 2008-05-11 The book provides the newest definitive text on the current techniques used in assessing vascular disorders. Readers will receive authoritative information and will be guided through the establishment and accreditation of a vascular laboratory and introduced to the physics of diagnostic testing. The chapters comprehensively explain the use of ultrasound in diagnosing cerebrovascular, renovascular, visceral ischemia, and peripheral arterial disease, as well as venous disorders and deep abdominal vascular conditions. The book contains over 300 illustrations, many of them in color. The book will be invaluable to physicians who treat vascular disorders, surgeons, cardiologists, vascular radiologists, and the vascular laboratory staff.

Contagious Communities Roberta E. Bivins, 2015 It was only a coincidence that the NHS and the Empire Windrush, a ship carrying 492 migrants from Britain's West Indian colonies, arrived together. On 22 June 1948, as the ship's passengers disembarked, frantic preparations were already underway for 5 July, the Appointed Day when the nation's new National Health Service would first open its doors. The relationship between immigration and the NHS rapidly attained and has enduringly retained notable political and cultural significance. Both the Appointed Day and the post-war arrival of colonial and Commonwealth immigrants heralded transformative change. Together they reshaped daily life in Britain and notions of Britishness alike. Yet the reciprocal impacts of post-war immigration and medicine in post-war Britain have yet to be explored. Contagious Communities casts new light on a period which is beginning to attract significant historical interest. Roberta Bivins draws attention to the importance but also the limitations of medical knowledge, approaches, and professionals in mediating post-war British responses to race, ethnicity, and the emergence of new and distinctive ethnic communities. By presenting a wealth of newly available or previously ignored archival evidence, she interrogates and re-balances the political history of Britain's response to New Commonwealth immigration. Contagious Communities uses a set of linked case studies to map the persistence of race in British culture and medicine, alike the limits of belonging in a multi-ethnic welfare state, and

the emergence of new and resolutely unimagined communities of patients researchers clinicians policy makers and citizens within the medical state and its global contact zones
