Scurfield,2006 A nationally renowned PTSD authority reveals the psychiatric impact of war on soldiers and veterans denied or minimized by government and the military Through efforts to treat veterans of past conflicts he illustrates the inevitability of lifelong psychiatric scars from today's conflicts as well **The Sciences' Media Connection -Public Communication and its Repercussions** Simone Rödder,Martina Franzen,Peter Weingart,2011-12-02 The Yearbook addresses the overriding question what are the effects of the opening up of science to the media Theoretical considerations and a host of empirical studies covering different configurations provide an in depth analysis of the sciences media connection and its repercussions on science itself They help to form a sound judgement on this recent development Relay Race To Infinity, The: Developments In Mathematics From Euclid To Fermat Derek Allan Holton,John Stillwell,2024-10-08 Why were most historically important mathematicians wealthy Why were they often lawyers and many had pastors for fathers Why were original results sometimes discovered by two mathematicians independently within a short time of each other Why did the Italian Fibonacci speak Arabic It all began a couple of years ago when one of the authors started to write short biographies of important historical mathematicians for the teaching journal Australian Primary

Mathematics Classroom It was felt that teachers generally knew very little about the way the subject developed or the people who developed it And it was felt that historical knowledge would help them see how the subject progressed and enable them to fit in with the historical episodes that would be of interest to students Clearly the book that developed contains mathematics up to the 17th century but we are keen to set the subject in those times to try to give short biographies of the people involved as well as provide a perspective of the events that led up to the times and led up to the mathematics Importantly it is shown that the maths enterprise was not undertaken by a small few but worked like a relay race One or a few might take up an idea and develop it but it often gets only so far Later others would take up the idea the baton and the relay race to find results continues
