The Past Before Us Romila Thapar, 2013-10-14 The claim that India uniquely among civilizations lacks historical writing distracts us from a more pertinent question how to recognize the historical sense of societies whose past is recorded in ways very different from European conventions Romila Thapar a distinguished scholar of ancient India guides us through a panoramic survey of the historical traditions of North India revealing a deep and sophisticated consciousness of history embedded in the diverse body of classical Indian literature The history recorded in such texts as the Ramayana and the Mahabharata is less concerned with authenticating persons and events than with presenting a picture of traditions striving to retain legitimacy amid social change Spanning an epoch from 1000 BCE to 1400 CE Thapar delineates three strains of historical writing an Itihasa Purana tradition of Brahman authors a tradition composed mainly by Buddhist and Jaina monks and scholars and a popular bardic tradition The Vedic corpus the epics the Buddhist canon and monastic chronicles inscriptional evidence regional accounts and literary forms such as royal biographies and drama are all scrutinized afresh not as sources to be mined for factual data but as genres that disclose how Indians of ancient times represented their own past to themselves

Herbert E. Bolton and the Historiography of the Americas Russell Magnaghi,1998-08-20 The comparative approach to the understanding of history is increasingly popular today This study details the evolution of comparative history by examining the career of a pioneer in this area Herbert E Bolton who popularized the notion that hemispheric history should be considered from pole to pole Bolton traced the study of the history of the Americas back to 16th century European accounts of efforts to bring civilization to the New World and he argued that only within this larger context could the histories of individual nations be understood After American entry into the Spanish American War in 1898 historians such as Bolton promoted the idea of comparative history and it remains to this day a significant historiographical approach Consideration of the history of the Americas as a whole dates back to 16th century European treatises on the New World Chapter one of this study provides an overview of pre Bolton formulations of such history In chapter two one sees the forces that shaped Bolton s thinking and brought about the development of the concept Chapters three and four focus upon the evolution of the approach through Bolton s history course at the University of California at Berkeley and the reception of the concept among Bolton s contemporaries Unfortunately Bolton never fully developed the theoretical side of his argument thus chapter five chronicles the decline of his ideas after his death The final chapter reveals the survival of the concept which is now embraced by a new generation of historians who are largely unfamiliar with Bolton s instrumental role in the promotion of comparative history **Re-constructing Archaeology** Michael Shanks,Christopher Tilley,2016-09-17 InRe Constructing Archaeology Shanks and Tilley aim to challenge the disciplinary practices of both traditional and the new archaeology and to present a radical alternative a critically self consious archaeology aware of itself as pracitce in the present and equally a social archaeology that appreciates artefacts not merely as ojects of analysis but as part of a social world of past and present that is charged with meaning It is a fresh and invigorating contribution to the emergence of a philosophically and politically informed archaeology *Prologue* ,1982 Literary Theory's Future(s) Joseph P. Natoli,1989 *The Knickerbocker* ,1842 *Advocate and Family Guardian* ,1859 *The Athenaeum* ,1843 **The Clash** Walter LaFeber,1998 One of America s leading historians tells the entire story behind the disagreements tensions and skirmishes between Japan a compact homogeneous closely knit society terrified of disorder and America a sprawling open ended society that fears economic depression and continually seeks an international marketplace Photos The Paradox of Preservation Laura Alice Watt,2017 Point Reyes National Seashore has a long history as a working landscape with dairy and beef ranching fishing and oyster farming yet since 1962 it has also been managed as a National Seashore The Paradox of Preservation chronicles how national ideals about what a park ought to be have developed over time and what happens when these ideals

are implemented by the National Park Service NPS in its efforts to preserve places that are also lived in landscapes Using the conflict surrounding the closure of the Drakes Bay Oyster Company Laura Alice Watt examines how NPS management policies and processes for land use and protection do not always reflect the needs and values of local residents Instead the resulting landscapes produced by the NPS represent a series of compromises between use and protection and between the area s historic pastoral character and a newer vision of wilderness A fascinating and deeply researched book *The Paradox of Preservation* will appeal to those studying environmental history conservation public lands and cultural landscape management and to those looking to learn more about the history of this dynamic California coastal region **Records and**

Wayne Ross,2012-02-01 The third edition of *The Social Studies Curriculum* thoroughly updates the definitive overview of the primary issues teachers face when creating learning experiences for students in social studies By connecting the diverse elements of the social studies curriculum history education civic global and social issues the book offers a unique and critical perspective that separates it from other texts in the field This edition includes new work on race gender sexuality critical multiculturalism visual culture moral deliberation digital technologies teaching democracy and the future of social studies education In an era marked by efforts to standardize curriculum and teaching this book challenges the status quo by arguing that social studies curriculum and teaching should be about uncovering elements that are taken for granted in our everyday experiences and making them the target of inquiry *The Essential Books of Mormons - Complete Collection*
