The People of Perth and the City Peter Williams,2019-03-08 Contemporary urban studies engages a wide range of approaches in the analysis of the processes at work in urban areas These approaches derive from anthropology economics geography history politics and sociology as well as from the professional experience of town planning and architecture Social process and the city reflects this growing cross disciplinary engagement This shows the important problematic role which cities in particular and urban change in general have played in the growth of Australia The overriding concern of each essay in this collection is to develop an understanding of the ways urban areas function and an awareness of how differing interpretations of urban phenomena might be applied This attention to the nature of the forces at work and the processes these forces manifest themselves in is extended both empirically and conceptually This book was first published in 1983

The Origins of Australia's Capital Cities Pamela Statham,1989 The Origins of Australia s Capital Cities is a comprehensive survey well illustrated with maps and plans which aims to answer two questions First why Australia s eight capital cities are situated where they are and second how they were established Pairs of chapters on each of the State capitals Sydney Hobart Perth Adelaide Melbourne and Brisbane are accompanied by

studies of Canberra as the federal capital and Darwin as a territorial capital A capital is the administrative centre of a political entity and in Australia unlike many overseas countries a uniquely high proportion of the population resides in the capitals Companion chapters examine the causes of initial European settlement in each area and reasons for the actual establishment of each capital city Attention is given to such topics as planning and layout the basis of growth potential rivals the social nature of the cities and the nature of their spread While there have been no other volume covering all the capitals to seek answers to the same basic questions This will therefore be an invaluable source book and provide a stimulus to further enquiry in the social history of Australia An introduction by the editor pulls together the general strands which link the chapters and highlights the ways in which the Australian experience contrasts with the urban experience overseas

Myths and Memories Cindy Lane, 2015-02-27 This book examines the perceptions of European travelling writers about southern Western Australia between 1850 and 1914 Theirs was a narrow vision of space and people in the region shaped by their individual personalities their position in society and the prevailing discourses and ideologies of the age Christian Enlightenment and Romantic philosophies had a major influence on their responses to the land its cultivation and conservation and its aesthetic qualities and on their views of both indigenous and settler colonial society their class and assumptions of race and ethnicity The travelling men and women perpetuated an idealised view of a colonised landscape and a pioneer community that eliminated class struggle and inequality even though an analysis of their observations suggests otherwise Nevertheless although limited their narratives are invaluable as a reflection of opinions attitudes and knowledge prevalent during an age of imperialism Their perspectives reveal unique viewpoints that differ from those of immigrants who wrote about their hopes and fears in making a new life for themselves These travellers were economically secure literate and educated foundations which provide an insight into the way power and privilege implicit in their writings governed the way they imagined Western

Australia in the colonial and immediate post federation period The tinted lenses through which European travelling writers narrowly observed space and people presented a mythical imagined sense of southern Western Australia

Imperial Theory and Colonial Pragmatism David J. Gilchrist, 2017-09-04 This book considers the role played by co operative agriculture as a critical economic model which in Australia helped build public capital drive economic development and impact political arrangements In the case of colonial Western Australia the story of agricultural co operation is inseparable from that of the story of Charles Harper Harper was a self starting pioneering frontiersman who became a political commercial and agricultural leader in the British Empire's most isolated colony during the second half of the Victorian era He was convinced of the successful economic future of Western Australia but also pragmatic enough to appreciate that the unique challenges facing the colony were only going to be resolved by the application of unorthodox thinking Using Harper's life as a foil this book examines Imperial economic thinking in relation to the co operative form of economic organisation the development of public capital and socialism It uses this discussion to demonstrate the transfer of socialistic ideas from the centre of the Empire to the farthest reaches of the Antipodes where they were used to provide a rhetorical crutch in support of purely pragmatic co operative establishments
