The Impact Of Minority Rights Mechanisms:

The Impact of Minority Rights Mechanisms Rianne M. Letschert, 2005 Different cultures languages and religions enrich society If this assumption was embraced by everyone there would not be a problem Unfortunately past and contemporary practice shows a picture of oppression forced assimilation and even destruction of minority groups with characteristics different from the majority Although legal and quasi legal instruments were adopted after both the First and the Second World Wars it was not until after the fall of the Berlin Wall that the protection of persons belonging to national minorities became a really dominant issue in the international legal and political arenas From the beginning of the 1990s States and their international organisations have developed new minority rights instruments and procedures that try to encourage States to live up to their obligations This book focuses on three mechanisms in the field the OSCE High Commissioner on National Minorities est 1992 the UN Working Group on Minorities est 1995 and the CoE Advisory Committee on Minorities est 1997 The core question raised is whether the three mechanisms with the variety of approaches and working methods at their disposal really make a difference in the protection of national minorities Are the interests of the minorities taken more seriously and have they been better protected due to the interventions by one or more of the mechanisms Based on a thorough and critical analysis of the three organisations and their achievements the author comes to a series of conclusions as to a better protection of national minorities Since all three organisations are currently discussing ways to improve the monitoring of minority rights obligations this book will be of great value to all persons and institutions that play a focal role in this study be it as a scholar or as a practitioner Rianne Letschert studied international law at Tilburg University She is currently working as a researcher and General Manager at the International Victimology Institute Tilburg Intervict of Tilburg University The Netherlands

The Impact of Minority Rights Mechanisms Rianne M. Letschert, 2005-12-22 History shows a pattern of oppression forced assimilation and even destruction of minority groups Although legal and quasi legal instruments were adopted after both the First and Second World Wars it was not until after the fall of the Berlin Wall that the protection of persons belonging to national minorities became a dominant issue in the international legal and political arenas This book focuses on three mechanisms in the field the OSCE High Commission on National Minorities established in 1992 the UN Working Group on Minorities established 1995 and the CoE Advisory Committee on Minorities established 1997 The core question examined is whether these mechanisms with the variety of approaches and working methods at their disposal really make a difference in the protection of national minorities Rianne Letschert received the University of Tilburg Prize for the second best dissertation for the doctoral thesis *The Impact of Minority Rights Mechanisms on the impact of international minority rights mechanisms on the implementation of minority rights* *International Human Rights Monitoring Mechanisms* Brice Dickson, 2022-12-08 Brice Dickson examines the engagement of the United Kingdom with international human rights monitoring mechanisms in particular those operated by the United Nations and the Council of Europe since

2000 Dickson explores how these mechanisms work in practice and whether they have any identifiable impact on how human rights are protected in the UK

Pentassuglia, 2009 Set against previous stages of minority protection under international law this book discusses the role of courts and court like bodies particularly in the Americas Africa and Europe in articulating and accommodating the interests and needs of ethno cultural minority groups as part of the human rights discourse Conceptually it exposes different moments of intervention by such bodies involving the recognition of group existence or identity the adjustment of human rights norms to accommodate the group s perspectives the establishment of processes designed to address the complexities resulting from competing claims and the expansion of procedural avenues within litigation The result is a fresh comparative practical and theoretical perspective on international jurisprudence as an emerging distinctive component in the complex history of the field

Synergies in Minority Protection Kristin Henrard, Robert Dunbar, 2008 Have recent developments in international

and European law resulted in an integrated and coherent system of minority protection **Minorities, their Rights, and the Monitoring of the European Framework Convention for the Protection of National Minorities** Tove H.

Malloy, Ugo Caruso, 2013-08-22 In *Minorities their Rights and the Monitoring the European Framework Convention for the Protection of National Minorities* Malloy and Caruso have collected a number of essays authored by prominent European experts on minority rights with aim to provide a first ever description and analysis of the processes guiding the monitoring of the Convention The volume addresses both the technical and political side of the monitoring and it brings in not only views from the host of the Convention the Council of Europe but also from the external players that interact with the Convention in the course of seeking to protect Europe s national minorities *International Human Rights in Context* Henry J.

Steiner, Philip Alston, Ryan Goodman, 2008 Completely revised and updated to bring it up to date with recent events this popular textbook incorporates a wide range of carefully edited materials from both primary and secondary sources

Indigeness in Africa Felix Mukwiza Ndahinda, 2011-04-27 With a Foreword by Prof Ashj rn Eide a former Chairman of the UN Working Group on Indigenous Populations Chairman of the UN Working Group on Minorities President of the Advisory Committee on National Minorities of the Council of Europe Following the internationalization of the indigenous rights movement a growing number of African hunter gatherers pastoralists and other communities have channelled their claims for special legal protection through the global indigenous rights movement Their claims as the indigenous peoples of Africa are backed by many international actors such as indigenous rights activists donors and some academia However indigenous identification is contested by many African governments some members of non claimant communities and a number of anthropologists who have extensively interacted with claimant indigenous groups This book explores the sources as well as the legal and political implications of indigenous identification in Africa By highlighting the quasi inexistence of systematic and discursive rather than activist studies on the subject matter the analysis questions the appropriateness of this

framework in efforts aimed at empowering claimant communities in inherently multiethnic African countries The book navigates between various disciplines in trying to better capture the phenomenon of indigenous rights advocacy in Africa The book is valuable reading for academics in law and all other social sciences such as anthropology sociology history political science as well as for economists It is also a useful tool for policy makers legal practitioners indigenous rights activists and a wide range of NGOs Dr Felix Mukwiza Ndahinda is Associate Professor at the International Victimology Institute Tilburg INTERVICT Tilburg University The Netherlands

The Interrelation Between the Right to Identity of Minorities and Their Socio-economic Participation Kristin Henrard, 2013-01-09 Drawing on various disciplines and case studies from several corners of the world this volume offers insights about the breadth and complexity of the inter relation between the socio economic participation of minorities and their right to respect for identity
