Gildersleeve, 2019-12-03 Basil L Gildersleeve s The Creed of the Old South 1865 1915 is a seminal work that delves into the intricate social political and cultural fabric of the Southern United States during a pivotal period in American history Through a rich tapestry of historical analysis and literary narrative Gildersleeve unpacks the prevailing ideologies that shaped Southern identity post Civil War His prose blends rigorous scholarship with evocative

language providing deep insights into the complexities of Southern beliefs and practices as they evolved in response to modernization and Reconstruction. As a reflection of its time, the book examines themes of nostalgia, regional pride, and the struggles against Northern hegemony in forming a unique Southern consciousness. Basil L. Gildersleeve, an esteemed scholar of linguistics and literature, was born in the South and maintained profound ties to his native region. His academic journey informed his exploration of Southern culture, particularly the interplay between language and identity. Gildersleeve's personal experiences combined with his scholarly background contribute to the depth and authenticity of his examination of the South's ethos and its controversial past. This book is essential for anyone interested in understanding the moral and philosophical underpinnings of Southern culture during a transformative era. Scholars, students, and casual readers alike will find Gildersleeve's work to be an enlightening resource that challenges preconceptions while offering a nuanced perspective on the Old South's legacy.

Memories of a Publisher, 1865-1915 George Haven Putnam, 1915 [Blacks in Topeka, Kansas, 1865-1915](#) Thomas C. Cox, 1999-03-01 Tracing the development of a black community in the trans-Mississippi West, *Blacks in Topeka, Kansas, 1865-1915* is a thorough, insightful examination of an area of black history that has received at best scant attention. Thomas C. Cox probes in this study the political, social, and economic standing of blacks and the growth of black institutions in the Topeka area from early settlement during the territorial period through the rise of an urban Topeka in the late nineteenth and early twentieth centuries. Pivotal in the development of the black community was the Great Exodus of the 1870s, the massive migration of southern blacks that brought the community new leaders, businessmen, and skilled laborers and provided the impetus for establishment of institutions and elaborate social structures. Assessing the impact of the Exodus on social stratification and on the destruction of power, Cox closely examines the establishment of political and social clubs, the founding of churches, the rise of the black press, including the influential *Colored Citizen* and *Plaindealer*, and the emergence of such community leaders as John Wright, William Eagle, and James Guy. The racial discrimination that permeated Topeka and intensified in the wake of the Great Exodus soon brought about organized protest by the black community to advance the causes of reform and social progress. As this movement grew in strength, it became a powerful bond that overcame divisions within black Topeka and gave rise to a cohesive community grounded in strong local institutions through which blacks could challenge city, state, and national attitudes and events. In the case of Topeka, which in many ways was exceptional, discrimination helped to create a significant degree of self-determination. With relevance to American social history in general, Thomas Cox's *Blacks in Topeka, Kansas, 1865-1915* fully utilizes the methods and materials of social history, including census analysis and group biography, to conclusively demonstrate the significance of Topeka in the history of race relations and the growth of black political and nonpolitical institutions.

Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1978 **Transformations in Africana Studies** Adebayo Oyejide, 2023-02-07 This book introduces readers to the rich discipline of Africana Studies, reflecting on how it has

developed over the last fifty years as an intellectual enterprise for knowledge production about Africa and the African diaspora. The African world has always had a wealth of indigenous knowledge systems, but for the greater part of the scholarly history, hegemonic Western epistemologies have denied the authenticity of African indigenous ways of knowing. The post-colonial era has seen steady and deliberate efforts to expand the frontiers of knowledge about Black people and their societies and to Africanize such bodies of knowledge in all fields of human endeavor. This book reflects on how the multidisciplinary discipline of Africana Studies has transformed and reinvented itself as it has sought to advance knowledge about the African world. The contributors consider the foundations of the discipline, its key theories and methods of knowledge production, and how it interacts with popular culture, Women's Studies, and other area studies such as Ethnic and Afro-Latinx Studies. Bringing together rich insights from across history, religion, literature, art, sociology, and philosophy, this book will be an important read for students and researchers of Africa and Africana Studies.
