The Innovators Situation Upper Middle Class Conservatism In Agricultural Communities:

Agricultural Economics Research ,1980 The Innovator's Situation Frank Cancian,1977 **The Innovator's Situation** Frank Cancian,1979-01-01 **The Decline of Community in Zinacantan** Frank Cancian,1994-10-01 This ambitious wide ranging work shows how national economic prosperity and government expansion in Mexico during the 1970 s transformed a relatively closed peasant community into a more outwardly connected socially differentiated society marked by dissension and overt conflict **Farmers' Perspectives on Risks and Social Capital in the Mekong Delta** Ngo Thi Phuong Lan,2022-07-21 This book analyses the risky behavior of farmers in the Mekong Delta Vietnam in their shift from rice to shrimp farming as well as the role of social capital in these farmers economic activities Emphasizing the rationality of the market does not fully explain the nature of farmers economic behavior Therefore this book explores farmers risk mitigation and dispersion so as to provide a systematic outlook on the issue It finds that food security and subsistence margin influence farmers behavior to some extent In the context of current social relations farmers do not completely avoid risks but they have different risk taking strategies As the book shows social reciprocity in terms of capital labor and land allows poor farmers to participate in shrimp farming in a risky manner *Proyecto Cooperativo de Investigacion Sobre Tecnologia Agropecuaria en America Latina "protaal" Technological Change and Peasant in Latin America* , *The Journal of Agricultural Economics Research* ,1988 *Beyond Eurocentrism* Peter Gran,2021-02-01 Eurocentrism influences virtually all established historical writing With the rise of Prussia and by extension Europe eurocentrism became the dominant paradigm for world history Employing the approaches of Gramsci and Foucault Peter Gran proposes a reconceptualization of world history He challenges the traditional convention of relying on totalitarian or democratic functions of a particular state to explain and understand relationships of authority and resistance in a number of national contexts Gran maintains that there is no single developmental model but diverse forms of hegemony that emerged out of the political crisis following the penetration of capitalism into each nation In making comparisons between seemingly disparate and distinctive nations and by questioning established canons of comparative inquiry Gran encourages people to recognize the similarities between the West and non West nations **Diffusion of Innovations, 4th Edition** Everett M. Rogers,2010-07-06 Since the first edition of this landmark book was published in 1962 Everett Rogers s name has become virtually synonymous with the study of diffusion of innovations according to Choice The second and third editions of Diffusion of Innovations became the standard textbook and reference on diffusion studies Now in the fourth edition Rogers presents the culmination of more than thirty years of research that will set a new standard for analysis and inquiry The fourth edition is 1 a revision of the theoretical framework and the research evidence supporting this model of diffusion and 2 a new intellectual venture in that new concepts and new theoretical viewpoints are introduced This edition differs from its predecessors in that it takes a much more critical stance in its review and synthesis of 5 000 diffusion publications During the past thirty years or so diffusion research has grown to be

widely recognized applied and admired but it has also been subjected to both constructive and destructive criticism This criticism is due in large part to the stereotyped and limited ways in which many diffusion scholars have defined the scope and method of their field of study Rogers analyzes the limitations of previous diffusion studies showing for example that the convergence model by which participants create and share information to reach a mutual understanding more accurately describes diffusion in most cases than the linear model Rogers provides an entirely new set of case examples from the Balinese Water Temple to Nintendo videogames that beautifully illustrate his expansive research as well as a completely revised bibliography covering all relevant diffusion scholarship in the past decade Most important he discusses recent research and current topics including social marketing forecasting the rate of adoption technology transfer and more This all inclusive work will be essential reading for scholars and students in the fields of communications marketing geography economic development political science sociology and other related fields for generations to come *Tipologia de Pequenos Produtores Campesinos* ,
