A History of the Laws of War:

Volume 2 Alexander Gillespie, 2011-10-07 This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of particular classes of weapons that may be used in times of conflict Thus it is that this work is divided into three substantial parts Volume 1 on the laws affecting combatants and captives Volume 2 on civilians and Volume 3 on the law of arms control This second book on civilians examines four different topics The first topic deals with the targetting of civilians in times of war This discussion is one which has been largely governed by the developments of technologies which have allowed projectiles to be discharged over ever greater areas and attempts to prevent their indiscriminate utilisation have struggled to keep pace The second topic concerns the destruction of the natural environment with particular regard to the utilisation of starvation as a method of warfare and unlike the first topic this one has rarely changed over thousands of years although contemporary practices are beginning to represent a clear break from tradition The third topic is concerned with the long standing problems of civilians under the occupation of opposing military forces where the practices of genocide collective punishments and or reprisals and rape have occurred The final topic in this volume is about the theft or destruction of the property of the enemy in terms of either pillage or the intentional devastation of the cultural property of the opposition As a work of reference this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself

The African Charter on Human and Peoples' Rights Volume 2 Nat Rubner, 2023 Landmark study of the African Charter on Human and Peoples Rights Documents on one side the international community's inability to foist a human rights system upon Africa and on the other the process within the OAU now African Union that eventually brought it into being and determined its content The African Charter on Human and Peoples Rights ACHPR which was proposed in 1979 adopted in 1981 and came into effect in 1986 was the first non Western declaration of human rights and the first official statement of an African human rights perspective With Africa largely absent in 1948 when the Universal Declaration of Human Rights UDHR was adopted it stands in stark historical reproach to the Western conception of universal human rights as a pivotal document in the decolonisation of the continent This book for the first time presents a comprehensive account of the development of the ACHPR which is key to a proper understanding of its fundamental nature Through documenting its process of

construction it becomes possible to understand how Africans themselves understood the process and the issues involved and how the ACHPR became a political text asserted by African leaders and not a continuum of a so called universal human rights tradition The result is a radical repositioning of the underlying context of the ACHPR one of the most important documents in modern African history of how it came to be and how it should therefore be understood Volume 2 describes the process through which the ACHPR came into being Analysing the role of Western governments the UN and NGOs it shows that contrary to the prevailing view of African human rights commentators their influence was limited and at times counter productive That in fact the formulation of the ACHPR was a profoundly political process that was primarily a product of an African desire to instigate its own human rights perspective as a counter to the human rights universalism advanced by the Western post war human rights tradition
