*The Life & Times of Sir Alfred Chester Beatty* Arthur J. Wilson, 1985      Mining Tycoons in the Age of Empire, 1870-1945 Raymond E. Dumett, 2016-12-05 The years of the late nineteenth and early twentieth centuries aptly described by Mark Twain as the Gilded Age witnessed an unprecedented level of technological change material excess untrammled pursuit of profit and imperial expansion Within this dynamic and often ruthless environment many colorful characters strode across the world stage among them the great mining tycoons who with the thousands of prospectors diggers shift bosses timbermen blastmen and muckers in mining enterprise constituted one of the major spearheads of global capitalistic expansion and colonial exploitation This volume which carries the epic story to the mid twentieth century provides a truly international perspective on the role of mining entrepreneurs investors and engineers in shaping the economic and political map of the globe in testing management techniques and in setting a vogue for extravagant displays of wealth among the world's rich Each chapter is loosely focussed on a biographical account of a particular mining tycoon that allows for broad and comparative accounts to be made about the individuals their business interests the technologies they employed and the national and international political considerations under which they operated Furthermore this structure also allows for consideration of the effect that these tycoons had on the countries and territories in which they worked particularly the often long lasting impact on indigenous populations the environment transport links and economic development By approaching the subject matter through this stimulating mix of cultural social economic business and colonial history many intriguing and thought provoking conclusions are reached that will reward any scholars with an interest late nineteenth and early twentieth century history

**The Story of the Bodmer Papyri** James M Robinson, 2013-02-28 The United Nations Educational and Cultural Organization UNESCO entrusted author James Robinson with tracking down the place where the Nag Hammadi Codices had been discovered Priests whom the author interviewed in the region told Robinson that the codices had once been in the possession of a priest in the town of Dishna a bit further upstream than Nag Hammadi itself Robinson found that this priest had not had the Nag Hammadi Codices but rather the Bodmer Papyri For Dishna is where the monastery headquarters of the first monastic order was located The Bodmer Papyri discovery consisted of all that was left of the library of the Pachomian monastic order Coptic letters of Pachomius and very early Greek copies of Luke and John perhaps donated when Athanasius was in hiding at the monastery These treasures were preserved in a jar hidden in the mountain where monks were buried This book traces the story of the Bodmer Papyri from beginning to end

The Chester Beatty Biblical Papyri at Ninety Garrick Vernon Allen, Usama Ali Mohamed Gad, Kelsie Gayle Rodenbiker, Anthony Philip Royle, Jill Unkel, 2023-05-08 Despite the significant work carried out on the text transmission materiality and scribal habits preserved in the Chester Beatty Biblical Papyri since their acquisition by Beatty ninety years ago in 1931 these early copies of Jewish scripture and the New Testament have for the most part belonged primarily to textual critics The goal of this book is to

resituate this important collection of manuscripts in broader contexts examining their significance in conversation with papyrology as a discipline in the context of other ancient literary traditions preserved on papyri and in discussion with the intellectual and cultural history of collecting colonialism and scholarly rhetoric The Chester Beatty Biblical Papyri and other papyrological collection with which they are inextricably bound remind us of the critical value of examining old manuscripts afresh in their historical scholarly and intellectual contexts These studies are relevant for all scholars who work with manuscripts and ancient texts of any variety *The Grove Encyclopedia of American Art* Joan M. Marter, 2011 Arranged in alphabetical order these 5 volumes encompass the history of the cultural development of America with over 2300 entries

**The Living Rock** Arthur Wilson, 1994 This book concentrates on the social and economic effects that metals have had on community life and on wider historical developments It gives a fascinating perspective proclaiming that the history of metals is the history of civilization basing the text on the results of archeometallurgists and materials scientists and looking at the advancement of societies as a direct result of their new found technology The author's clear and lucid style prevents the book becoming aridly academic while he maps the course of ancient history through to medieval times and beyond showing metal to be ultimately the key to history *From the Grand Canal to the Dodder* Beatrice M. Doran, 2021-01-18 The Dublin

suburbs situated between the Grand Canal and the River Dodder consist of distinct neighbourhoods each with their own character and style It is an area that was and continues to be home to poets writers artists politicians and academics all of whom in their own way contributed to Irish life Those featured include Jack B Yeats artist Mother Mary Aikenhead Founder of the Religious Order Brendan Behan writer and dramatist Mary Lady Heath aviator and international athlete Sophie Bryant mathematician educationist and suffragette James Franklin Fuller architect and Seamus Heaney poet In this book Dr Beatrice M Doran tells of the lives of some of the most fascinating people who once lived on the leafy roads and avenues of this interesting area of the city **Industrial Minerals**, 1985 **India in Art in Ireland** Kathleen

James-Chakraborty, 2017-07-05 India in Art in Ireland is the first book to address how the relationship between these two ends of the British Empire played out in the visual arts It demonstrates that Irish ambivalence about British imperialism in India complicates the assumption that colonialism precluded identifying with an exotic other Examining a wide range of media including manuscript illuminations paintings prints architecture stained glass and photography its authors demonstrate the complex nature of empire in India compare these empires to British imperialism in Ireland and explore the contemporary relationship between what are now two independent countries through a consideration of works of art in Irish collections supplemented by a consideration of Irish architecture and of contemporary Irish visual culture The collection features essays on Rajput and Mughal miniatures on a portrait of an Indian woman by the Irish painter Thomas Hickey on the gate lodge to the Dromana estate in County Waterford and a consideration of the intellectual context of Harry Clarke's Eve of St Agnes window This book should appeal not only to those seeking to learn more about some of Ireland's most cherished

works of art but to all those curious about the complex interplay between empire anti colonialism and the visual arts

*Skillings' Mining Review* ,1988      **Collecting the Past** Toby Burrows,Cynthia Johnston,2018-10-03 Today s libraries and museums are heavily indebted to the passions and obsessions of numerous individual collectors who devoted their lives to amassing collections of books manuscripts artworks and other culturally significant objects *Collecting the Past* brings together the latest research on a wide range of significant British collectors from the eighteenth to the twentieth centuries including Hans Sloane Sarah Sophia Banks Thomas Phillipps Sydney Cockerell J P Morgan Jr Alfred Chester Beatty and R E Hart Contributors to the volume examine the phenomenon of collecting in a variety of settings and across a range of different materials Considering the aims and motives that led these collectors to assemble such remarkable collections the book also examines the history of these collections after the collector s death Particular attention is given to the often complicated relationship between collectors and the public institutions that subsequently came to house their collections Situated within the framework of cultural collecting more generally this book offers an authoritative series of essays on key collectors *Collecting the Past* should be most interesting to researchers academics and postgraduate students engaged in the study of museum studies book history manuscript studies museum history library history and the history of collecting Professionals in libraries museums and galleries will also find the volume of great interest      God's Library Brent Nongbri,2018-08-21 In this bold and groundbreaking book Brent Nongbri provides an up to date introduction to the major collections of early Christian manuscripts and demonstrates that much of what we thought we knew about these books and fragments is mistaken While biblical scholars have expended much effort in their study of the texts contained within the earliest Christian manuscripts there has been a surprising lack of interest in thinking about these books as material objects with individual unique histories We have too often ignored the ways that the antiquities market obscures our knowledge of the origins of these manuscripts Through painstaking archival research and detailed studies of the most important collections of early Christian manuscripts Nongbri vividly shows that the earliest Christian books are more than just carriers of texts or samples of handwriting They are three dimensional archaeological artifacts with fascinating stories to tell if we re willing to listen      Mining in World History Martin Lynch,2004-08-02 This book deals with the history of mining and smelting from the Renaissance to the present Martin Lynch opens with the invention sometime before 1453 of a revolutionary technique for separating silver from copper It was this invention which brought back to life the rich copper silver mines of central Europe in the process making brass cannon and silver coin available to the ambitious Habsburg emperors thereby underpinning their quest for European domination Lynch also discusses the Industrial Revolution and the far reaching changes to mining and smelting brought about by the steam engine the era of the gold rushes the massive mineral developments and technological leaps forward which took place in the USA and South Africa at the end of the 19th century and finally the spread of mass metal production techniques amid the violent struggles of the 20th century In an engaging concise and fast paced text he presents the

interplay of personalities politics and technology that have shaped the metallurgical industries over the last 500 years
