The Mills Of Medieval England:

The Mills of Medieval England Richard Holt, 1988 Examining the role mills played in the medieval economy and society of England this book looks at reasons behind the widely spread use of mills and their subsequent decline in the mid 14th century Topics discussed include different types of mills millers and their relationship with the manor **Mills in the Medieval Economy** John Langdon, 2004-07-01 The late medieval English milling industry epitomizes one of the most important technical achievements of early societies the exploitation of wind water and muscle power for augmenting human endeavours Through a computerized analysis of the number and variety of mills in England from 1300 to 1540 as well as the technology practices and personnel sustaining them Langdon reveals the structural evolution of the milling industry highlighting both its accomplishments and its limitations Although it focuses on England during the later middle ages the book s innovative methodologies and original findings will furnish useful comparative material for all scholars investigating pre industrial societies It also offers a challenging new perspective on the later middle ages as a time of change in addition to providing enthusiasts of old technologies generally with a wealth of detail about one of the most recognizable and enduring features of medieval society **The Routledge Handbook of Medieval Rural Life** Miriam Müller, 2021-10-26 The Routledge Handbook of Medieval Rural Life brings together the latest research on peasantry in medieval Europe The aim is to place peasants as small scale agricultural producers firmly at the centre of this volume as people with agency immense skill and resilience to shape their environments cultures and societies This volume examines the changes and evolutions within village societies across the medieval period over a broad chronology and across a wide geography Rural structures families and hierarchies are examined alongside tool use and trade as well as the impact of external factors such as famine and the Black Death The contributions offer insights into multidisciplinary research incorporating archaeological as well as landscape studies alongside traditional historical documentary approaches across widely differing local and regional contexts across medieval Europe This book will be an essential reference for scholars and students of medieval history as well those interested in rural cultural and social history *The Watermills and Landscape of the River Great Ouse, Cambridgeshire* Bridget Flanagan, Keith Grimwade, 2025-08-15 Uncovers the historical significance of water milling along the River Great Ouse using innovative methods revealing its national prominence and lasting landscape impact The River Great Ouse in Cambridgeshire has a long history of watermilling stretching back to at least the 10th century and possibly to the Roman period The authors use remote sensing LiDAR cartographic analysis fieldwork documents especially contemporary litigation and literary sources to reveal new findings about this fascinating landscape The Great Ouse s watermills were recorded as the most valuable in England in the Domesday Survey All their sites are located several having been long lost and a comprehensive explanation for their national pre eminence is given The expansion of activity in the Middle Ages is investigated through a detailed study of the disputes arising from the competing uses of the river and its floodplain for

watermilling navigation and farming Channel features that hitherto have either been ignored or attributed to natural processes are shown to be the result of milling activity The continuing impact of watermilling on the landscape until its decline in the second half of the 19th century is analysed The authors findings have broader implications for the understanding of the development of watermilling in lowland river landscapes the evolution of parish boundaries and the development of multi channel river forms They conclude by advocating a mapping methodology that designates landscape features resulting from watermilling as heritage assets to guide planning decisions
