20 Volume set brings together a diverse number of titles across many areas of developmental psychology from children's play to language development. The series of previously out of print titles originally published between 1930 and 1993 with the majority from the 70s and 80s includes contributions from many respected authors in the field and charts the progression of the field over this time. Early Influences Shaping The Individual Spyros Doxiadis, 2013-03-09 **Motivation and Delinquency** D. Wayne Osgood, Joan McCord, 1997-01-01 Motivational concepts pervade the classic theories of delinquency. And yet there has been little detailed analysis of the relationship between motivation and delinquency. In this 44th volume of the Nebraska Symposium on Motivation a group of leading scholars in a broad range of fields make up for that scholarly negligence giving explicit and systematic attention to the subject. Joan McCord opens the volume by considering fundamental questions about relationships between motivation, explanation, blame, and free will, thereby developing a base from which she poses a theory of motivation for crime. Michael Rutter and colleagues review findings concerning factors ranging from social organization to behavioral genetics throughout they grapple with various forms of delinquency from common misbehavior to persistent personality disorder. Gerald Patterson and Karen Yoeger's chapter on late onset delinquency extends their influential work and illustrates the application of behaviorist psychology that Patterson has been developing for over twenty years. James Tedeschi examines juvenile delinquency from the perspective of his social interactionist theory of violence, this theory based on the social psychology of interdependence construes violence as a coercive attempt at social influence. Finally Karen Heimer and Ross Matsueda compare the study of delinquency by social psychologists in the fields of psychology and sociology and present their own symbolic interactionist theory of delinquency. Developmental Psychopathology: Risk, disorder, and adaptation Dante Cicchetti, Donald J. Cohen, 1995 **Childhood and Human Nature** Sula Wolff, 2017-12-06 How do we make sense of people? Human behaviour is complex so that understanding ourselves and others calls for both objective and subjective viewpoints as well as a flexible appreciation of human development over time. Dr Sula Wolff believes that knowledge about personality development is essential in three important domains: in the appraisal of deviant behaviour at all ages, in the development of social policy for children, and in therapeutic interventions for children and their families. In this book originally published in 1989 Dr Wolff gives a comprehensive account of the major aspects of personality development in childhood. She reports research findings and presents developmental theories in their historical context, stressing the interplay between biological and cultural influences on development. Her account includes a wealth of illustrative case histories with children and parents speaking for themselves; these provide fascinating reading and give substance to statistical results and theoretical propositions. Clearly and simply written, the book will be of interest to many people and will still be of value to medical students, psychiatrists in training, students in social work and psychology, and teachers in special education. **Dictionary of Mental Handicap** Mary P. Lindsey, 2002-03-11 Over recent years the policy of isolating and institutionalizing mentally handicapped people has gradually been dismantled and a major shift to community

care has taken place But integration within the general community and access to special services has greatly increased the number of people with a need to know about mental handicap Each profession or discipline has its own terminology nowadays one must be conversant with all of them In this comprehensive dictionary Mary Lindsey has brought together terms and concepts from a wide variety of fields Approximately 2 400 entries are included ranging in length from concise explanations to encyclopaedic essays but always expressed in clear simple language Where appropriate suggestions for further reading are made and possible sources of further information given An extensive system of cross references leads the interested reader further and makes valuable connections between entries The medical aspects of mental handicap its causes prognoses and treatments are of course covered in detail But although the cause of mental handicap may be medical subsequent interventions may be sociological psychological educational medical paramedical or psychiatric This is reflected in the choice of entries making the Dictionary an invaluable source of reference for all those involved with mentally handicapped people in any capacity whatsoever *The Epidemiology of Childhood Hyperactivity* Eric A. Taylor,1991 Most previous research work on antisocial conduct disorders in children has not separated children with hyperkinesis caused by dysfunction of the brain from those whose hyperkinesis stems from psychosocial problems Using an entirely fresh approach this work develops methods to assess hyperactivity and other behavioral problems and to measure disturbance of attention and neurological development The study described in this monograph applies these methods in an epidemiological setting It clearly identifies and compares children with hyperactivity conduct disorder and both problems together with a control group of normal children **An Introduction to Clinical Child Psychology** S. J. E. Lindsay,Graham E. Powell,1989
