*Christianity* Philip Kennedy, 2011-02-22 The Christian faith has the allegiance of one third of the human race It has succeeded in influencing civilization to such a degree that we now take its existence almost for granted Yet it might all have been so different Christianity began with the words and deeds of an obscure village carpenter's son who died a shameful

criminal's death at the hands of the Roman occupiers of his country itself an insignificant outpost of the powerful ruling Empire. The feverish land of biblical Palestine awash with apocalyptic expectations of deliverance from its foreign overlords was hardly short of seers and prophets who claimed to be sent visions from God. Yet the followers of this man thought he was different so different in fact that some years after his death and asserted resurrection they scandalously insisted not only that he was sent by God but that he was God. How a provincial sect with its seemingly outrageous ideas became first the sanctioned religion of the Roman Empire and then over the course of 2000 years the creed of billions of people is the improbable story that this book tells. It is a story of freethinkers, friars, fanatics and firebrands and of the lay people not just the clerical or the powerful who have made up the great mass of Christians over the centuries. Many introductions to Christianity are written by Christians for Christians. This elegant textbook by contrast shows that the history of the religion while often glorious is not one of unimpeded progress but something still more remarkable, flawed and human.
