Contemporary Drawing Margaret Davidson, 2011-04-19 Drawing is experiencing an unparalleled surge in the art world Pass notions that once defined drawing as being a preparatory stage for painting or sculpture have long since been cast aside Drawing is now fully recognized as its own art form in the biennials art fairs museum exhibitions and beyond Drawing has come of age Contemporary artists are increasingly discovering that drawing is something unique and different from painting It is an intense sensitive compelling personal and utterly direct art form one with its own concepts characteristics and techniques In addition contemporary drawing is not governed by any particular imagery but rather encompasses a variety of approaches including realist abstract modernist and post modernist Contemporary Drawing delves into the essential and far reaching concepts of this medium exploring surface mark space composition scale materials and intentionality in turn Key techniques such as using nature to induce marks and working with a checklist to determine a drawing s problems are introduced throughout Plus an in depth chapter examines a number of artists such as William Kentridge and Gego who are breaking traditional boundaries that separate one artistic discipline from another Lushly illustrated by a wide range of highly accomplished contemporary artists Contemporary Drawing offers a broad perspective on this expansive and energized field of art

Exploring the Math and Art Connection Daniel Jarvis, Irene Naested, 2012 Daniel Jarvis and Irene Naested highlight the natural association between math and art in a series of practical ideas for the classroom because when students understand the math art connection their understanding and confidence increase in both subjects Through innovative teaching strategies and more than 100 rich learning experiences Jarvis and Naested give teachers a wealth of engaging tools to explore the math art connection with their own students This connection is established through examinations of natural and human designed objects from how pine cone scales spiral out in a Fibonacci sequence to how geometric shapes combine in architecture to form some of the most beautiful structures on the planet

Wayne Thiebaud Timothy Anglin Burgard, 2025-03-18 Explores Wayne Thiebaud s career as a self described thief who appropriated and reinterpreted old and new European and American artworks Although artist Wayne Thiebaud 1920 2021 earned acclaim for his poetic renderings of the prosaic particulars of American life he openly admitted that it s hard for me to think of artists who weren t influential on me because I m such a blatant thief Wayne Thiebaud Art Comes from Art features the artist s virtuosic appropriations and reinterpretations of old and new European and American artworks spanning from Andrea Mantegna to douard Manet Henri Matisse to Richard Diebenkorn offering crucial insights into his creative process Thiebaud s exploration of art artists and art history along with the practices of copying appropriation and reinterpretation allowed him not only to see through the eyes of other artists but also to commune with them through their work expanding his own vision This career long engagement with the concept of appropriation illustrates his perception of art history as an encyclopedic bureau of standards a rich repository

and resource that offers working artists community with their predecessors and communion with their artworks Published in association with the Fine Arts Museums of San Francisco Exhibition dates Legion of Honor March 22 August 17 2025

Lumen Naturae Matilde Marcolli, 2020-05-26 Exploring common themes in modern art mathematics and science including the concept of space the notion of randomness and the shape of the cosmos This is a book about art and a book about mathematics and physics In Lumen Naturae the title refers to a purely immanent non supernatural form of enlightenment mathematical physicist Matilde Marcolli explores common themes in modern art and modern science the concept of space the notion of randomness the shape of the cosmos and other puzzles of the universe while mapping convergences with the work of such artists as Paul Cezanne Mark Rothko Sol LeWitt and Lee Krasner Her account focusing on questions she has investigated in her own scientific work is illustrated by more than two hundred color images of artworks by modern and contemporary artists Thus Marcolli finds in still life paintings broad and deep philosophical reflections on space and time and connects notions of space in mathematics to works by Paul Klee Salvador Dal and others She considers the relation of entropy and art and how notions of entropy have been expressed by such artists as Hans Arp and Fernand Leger and traces the evolution of randomness as a mode of artistic expression She analyzes the relation between graphical illustration and scientific text and offers her own watercolor decorated mathematical notebooks Throughout she balances discussions of science with explorations of art using one to inform the other She employs some formal notation which can easily be skipped by general readers Marcolli is not simply explaining art to scientists and science to artists she charts unexpected interdependencies that illuminate the universe
