The Peculiarity of Man Janusz Piontek, Andrzej Wierciński, 1991 **Becoming Loquens** Bernard H. Bichakjian, 2000
Once declared an unworthy pursuit for learned linguists the study of language origins has recently become a matter of intensive respectable research The change is understandable because while the nineteenth century imaginative linguists could only speculate today s scientists can soberly investigate and present the hard data that could serve to outline the gradual evolution that led to the emergence and development of oral communication Tracing that process or rather contributing to that effort is the objective of this collection of articles and the collective endeavor of their authors who from their own specific vantage points primatology anthropology anatomy cognition neurology linguistics and sociology are presenting data and analyses that will help the reader to gain better insight and clearer understanding of how humans have developed that fascinating tool of ours language *Hominid Evolution* Herbert Ullrich, 1999 *Sociobiology and the Human Dimension* Georg Breuer, 1983-01-13 This book is about animals and humans their common features and their gradual and principle differences It tells of democracy in baboons prostitution in hummingbirds bigamy in wrens baby sitting in jackals of chimpanzees at the computer console and of the super ego of dogs but it is also about the labour productivity of hunter and gatherer peoples incest avoidance in animals and humans and of the myths about matriarchy In a language accessible to any interested layman Georg Breuer gives a balanced account of the main ideas and achievements of sociobiology and the main criticisms levelled against it According to him sociobiology has given many a valuable impetus but sometimes presents a distorted or one sided view In particular it has not answered or addressed the question of why man and man only is able to identify and feel sympathy with any other human being The evolution of this most human of all traits confers on us the capability for charity and solidarity and for the happiness of true love which is unattainable by any animal

Sourcebook of Family Theories and Methods Pauline Boss, William J. Doherty, Ralph LaRossa, Walter R. Schumm, Suzanne K. Steinmetz, 2008-11-19 Origins We call this book on theoretical orientations and methodological strategies in family studies a sourcebook because it details the social and personal roots i e sources from which these orientations and strategies flow Thus an appropriate way to preface this book is to talk first of its roots its beginnings In the mid 1980s there emerged in some quarters the sense that it was time for family studies to take stock of itself A goal was thus set to write a book that like Janus would face both backward and forward a book that would give readers both a perspective on the past and a map for the future There were precedents for such a project The Handbook of Marriage and the Family edited by Harold Christensen and published in 1964 the two Contemporary Theories about the Family volumes edited by Wesley Burr Reuben Hill F Ivan Nye and Ira Reiss published in 1979 and the Handbook of Marriage and the Family edited by Marvin Sussman and Suzanne Steinmetz then in production
