Goethe in English Derek Glass, Martin H. Jones, 2005 This bibliography was commissioned by the English Goethe Society as a contribution to the celebration in 1999 of the 250th anniversary of Goethe's birth. It sets out to record translations of his works into English that have been published in the twentieth century up to and including material published in that anniversary year. It aims to serve as wide a constituency as possible, be it as a simple reference tool for tracing a translation of a given work or as a documentary source for specialized studies of Goethe reception in the English speaking world. The work records publications during the century, not merely translations that originated during this period. It includes numerous reprintings of older material as well as some belated first publications of translations from the nineteenth century. It shows how frequent and how long enduring was the recourse of publishers and anthologists to a Goethe Victorian in diction, a signal factor in perceptions and misperceptions. Derek Glass was putting the finishing touches to the bibliography at the time of his sudden death in March 2004. Colleagues at Kings College London have edited the final manuscript, which is now published jointly by the English Goethe Society and the Modern Humanities Research Association, both as a worthy commemoration of Goethe's anniversary and as a tribute to Derek himself.

West Germany Donald S. Detwiler, Ilse E. Detwiler, 1987 A wide ranging bibliography on the region. Gender and the Science of Difference Jill A. Fisher, 2011-06-15 How does contemporary science contribute to our understanding about what it means to be women or men? What are the social implications of scientific claims about differences between male and female brains, hormones and genes? How does culture influence scientific and medical research and its findings about human sexuality, especially so-called normal and deviant desires and behaviors? *Gender and the Science of Difference* examines how contemporary science shapes and is shaped by gender ideals and images. Prior scholarship has illustrated how past cultures of science were infused with patriarchal norms and values that influenced the kinds of research that was conducted and the interpretation of findings about differences between men and women. This interdisciplinary volume presents empirical inquiries into today's science, including examples of gendered scientific inquiry and medical interventions and research. It analyzes how scientific and medical knowledge produces gender norms through an emphasis on sex differences and includes both U.S. and non-U.S. cases.
