The Peoples Forests American Land And Life Series:

The People's Forests Robert Marshall, 2002-06 Devoted conservationist environmentalist and explorer Robert Marshall 1901 1939 was chief of the Division of Recreation and Lands U S Forest Service when he died at age thirty eight Throughout his short but intense life Marshall helped catalyze the preservation of millions of wilderness acres in all parts of the U S inspired countless wilderness advocates and was a pioneer in the modern environmental movement he and seven fellow conservationists founded the Wilderness Society in 1935 First published in 1933 The People's Forests made a passionate case for the public ownership and management of the nation s forests in the face of generations of devastating practices its republication now is especially timely Marshall describes the major values of forests as sources of raw materials as essential resources for the conservation of soil and water and as a OC precious environment for recreationOCO and for OC the happiness of millions of human beings OCO He considers the pros and cons of private and public ownership deciding that public ownership and large scale public acquisition are vital in order to save the nation s forests and sets out ways to intelligently plan for and manage public ownership The last words of this book capture Marshall's philosophy perfectly OC The time has come when we must discard the unsocial view that our woods are the lumbermen s and substitute the broader ideal that every acre of woodland in the country is rightly a part of the people's forests OCO The United States Forest Service ,1973 Mexican Americans and the Environment Devon G. Peña, 2022-09-13 Mexican Americans have traditionally had a strong land ethic believing that humans must respect la tierra because it is the source of la vida As modern market forces exploit the earth communities struggle to control their own ecological futures and several studies have recorded that Mexican Americans are more impacted by environmental injustices than are other national origin groups In our countryside agricultural workers are poisoned by pesticides while farmers have lost ancestral lands to expropriation And in our polluted inner cities toxic wastes sicken children in their very playgrounds and homes This book addresses the struggle for environmental justice grassroots democracy and a sustainable society from a variety of Mexican American perspectives It draws on the ideas and experiences of people from all walks of life activists farmworkers union organizers land managers educators and many others who provide a clear overview of the most critical ecological issues facing Mexican origin people today The text is organized to first provide a general introduction to ecology from both scientific and political perspectives It then presents an environmental history for Mexican origin people on both sides of the border showing that the ecologically sustainable Norte o land use practices were eroded by the conquest of El Norte by the United States It finally offers a critique of the principal schools of American environmentalism and introduces the organizations and struggles of Mexican Americans in contemporary ecological politics Devon Pe a contrasts tenets of radical environmentalism with the ecological beliefs and grassroots struggles of Mexican origin people then shows how contemporary environmental justice struggles in Mexican American communities have challenged dominant concepts of environmentalism Mexican Americans and the

Environment is a didactically sound text that introduces students to the conceptual vocabularies of ecology culture history and politics as it tells how competing ideas about nature have helped shape land use and environmental policies By demonstrating that any consideration of environmental ethics is incomplete without taking into account the experiences of Mexican Americans it clearly shows students that ecology is more than nature study but embraces social issues of critical importance to their own lives Wood Construction ,1926 Forest Leaves ,1929 Rooted David R. Pichaske, 2009-05 David Pichaske has been writing and teaching about midwestern literature for three decades In Rooted by paying close attention to text landscape and biography he examines the relationship between place and art His focus is on seven midwestern authors who came of age toward the close of the twentieth century their lives and their work grounded in distinct places Dave Etter in small town upstate Illinois Norbert Blei in Door County Wisconsin William Kloefkorn in southern Kansas and Nebraska Bill Holm in Minneota Minnesota Linda Hasselstrom in Hermosa South Dakota Jim Heynen in Sioux County Iowa and Jim Harrison in upper Michigan The writers intimate knowledge of place is reflected in their use of details of geography language environment and behavior Yet each writer reaches toward other geographies and into other dimensions of art or thought jazz music and formalism in the case of Etter gender issues in the case of Hasselstrom time past and present in the case of Kloefkorn ethnicity and the role of the artist in the case of Blei magical realism in the case of Heynen the landscape of literature in the case of Holm and the curious worlds of academia best selling novels and Hollywood films in the case of Harrison The result Pichaske notes is the growing away from roots the explorations and alter egos of these writers of place and the tension between the here and there that gives each writer s art the complexity it needs to transcend provincial boundaries Quoting generously from the writers Pichaske employs a practical jargon free literary analysis fixed in the text making Rooted interesting readable and especially useful in treating the literary categories of memoir and literary essay that have become important in recent decades Hearings United States.
