The Perfect City Creating The North American Landscape:

Housing the North American City Michael Doucet, John C. Weaver, 1991-08-06 Doucet and Weaver begin this empirical analytical and narrative study with an analysis of the evolution of land development as an enterprise and continue with an examination of house design and construction practices the development of the apartment building and an account of class and age as they relate to housing tenure They also relate developments in Hamilton to the current state of urban historiography using their case study to resolve discrepancies and contradictions in the literature Among the major themes the authors deal with is a controversial exploration of what they see as a central North American urge the desire to own a home Other themes include the social allocation of urban space the quality and affordability of housing the increased interest of large corporations in the land development and financial service industries and a comparative analysis of housing in Canada and the United States The authors have drawn on civic and business records dating from the early nineteenth century to the latest planning data Combining this information with their comprehensive analysis Doucet and Weaver show that current housing problems and potential solutions are better understood when seen as part of a historical process They provide a critical assessment of the ways in which contemporary society produces shelter and question the use of technical innovations alone to resolve housing crises

Boston's "changeable Times" Michael Holleran, 2001 He describes subdivision design innovations and the use of deed restrictions limits on building heights and neighborhood zoning protection to control ever increasing urban growth

The Urban Design Reader Michael Larice, Elizabeth Macdonald, 2013-05-07 The second edition of The Urban Design Reader draws together the very best of classic and contemporary writings to illuminate and expand the theory and practice of urban design Nearly 50 generous selections include seminal contributions from Howard Le Corbusier Lynch and Jacobs to more recent writings by Waldheim Koolhaas and Sorkin Following the widespread success of the first edition of The Urban Design Reader this updated edition continues to provide the most important historical material of the urban design field but also introduces new topics and selections that address the myriad challenges facing designers today The six part structure of the second edition guides the reader through the history theory and practice of urban design The reader is initially introduced to those classic writings that provide the historical precedents for city making into the twentieth century Part Two introduces the voices and ideas that were instrumental in establishing the foundations of the urban design field from the late 1950s up to the mid 1990s These authors present a critical reading of the design professions and offer an alternative urban design agenda focused on vital and lively places The authors in Part Three provide a range of urban design rationales and strategies for reinforcing local physical identity and the creation of memorable places These selections are largely describing the outcomes of mid century urban design and voicing concerns over the placeless quality of contemporary urbanism The fourth part of the Reader explores key issues in urban design and development Ideas about sprawl density community health public space and everyday life are the primary focus here Several new selections in this

part of the book also highlight important international development trends in the Middle East and China Part Five presents environmental challenges faced by the built environment professions today including recent material on landscape urbanism sustainability and urban resiliency The final part examines professional practice and current debates in the field where urban designers work what they do their roles their fields of knowledge and their educational development The section concludes with several position pieces and debates on the future of urban design practice This book provides an essential resource for students and practitioners of urban design drawing together important but widely dispersed writings Part and section introductions are provided to assist readers in understanding the context of the material summary messages impacts of the writing and how they fit into the larger picture of the urban design field Mythic Galveston Susan Wiley Hardwick,2002 In *Mythic Galveston Reinventing America's Third Coast* Susan Wiley Hardwick examines Galveston's rapid rise and the myth created by immigrants and boosters of an abundant island with a highly temperate even tropical climate ideal for settlement Hardwick's historical analysis focuses on immigrant settlement patterns and the important contributions to Galveston's evolving sense of place made by diverse ethnic and racial groups BOOK JACKET *Handbook of Infrastructures and Cities* Olivier Coutard,Daniel Florentin,2024-04-12 Contributing towards a thriving research area this comprehensive Handbook presents a broad discussion of infrastructure as social phenomena It compiles diverse perspectives to delineate the current infrastructural turn and assess policy and research challenges relating to contemporary forms of infrastructural development Making the Metropolitan Landscape Jacqueline Tatom,Jennifer Stauber,2009-05-07 Bringing together for the first time many well known and emerging voices in urban design theory and practice this volume argues for a progressive and engaged design practice which fully relates to the complexity and diversity of American cities **The Countryside Ideal** Michael Bunce,2005-10-26 Draws together diverse images of landscape to explore the historical processes shaping our continuing attachment to the countryside seen in artistic expression attitudes to nature country life and the development of rural and urban land **The Routledge Companion to the American Landscape** Chris W.
