Contemporary Social Issues in Africa Mokong Simon Mapadimeng, Sultan Khan, 2010 This volume comprises of incisive and perceptive essays that analyse social issues in contemporary post colonial and post apartheid Africa using cases in three African cities Durban in South Africa Gaborone in Botswana and Kampala in Uganda It is an outcome of collaboration by colleagues from Universities of Kwazulu Natal Makerere Botswana and Dar es Salaam to establish a structured collaborative scholarly partnership programme The partnership is called Rethinking Africa Programme which is consistent with the 21st century ideals of Africa s renewal Its key objective is to re think Africa through academic and research initiatives sensitive to our own experiences as Africans as well as through a critical revisiting of western based social sciences in order to build new analytical models and concepts that capture processes and dynamics that derive from African experiences It thus has as its related aim to counter the proliferation of texts by western scholars on African social issues which dominate lecture rooms and libraries as teaching and learning resources in African universities It is hoped that this volume will encourage future partnerships on research and teaching of contemporary African social issues amongst African scholars within the continent

Planning and Practice Mukunda Mishra,R. B. Singh,Andrews José de Lucena,Soumendu Chatterjee,2021-11-16 This book through a bunch of systematic and analytical notes and scientific commentaries acquaints the readers with the innovative methods of regional development measurement of the development in regional scale regional development models and policy prescriptions Conceptualizing development as a regional process is a geographer s brainchild and the sense of region has long been rooted deeply in the fundamental research practices that geographers are accustomed to The geographical perspective of regions entails conceptualizing them nested horizontally as the formal region and hierarchical relationships in space with spatial flows or interactions as the functional region In geographical research the region works as a tool by serving as a statistical unit of analysis More importantly however regions serve as the fundamental spatial units of management and planning by specifying a territory or a part of it for which a certain spatial development or regulatory plan is sought This book addresses the complex processes in different regions of the world particularly South Asia to perceive the regional development planning involved and the sustainable management practiced there The book is a useful resource for socio economic planners policymakers and policy researchers **Rural-urban Dynamics in Francophone Africa** Jonathan Baker,1997 This book presents some examples of the richness and variety of contemporary research on rural urban interactions by francophone researchers Case studies are drawn from Burkina Faso Côte d'Ivoire Congo Benin Senegal and Togo Formation of Christian Conscience in Modern Africa Richard N. Rwiza,2001 This book deals with the formation of Christian conscience in modern Africa It can be divided into three parts The first part is a sociological review on urbanization in Africa The second part presents a theological reflection on conscience The third part presents a general survey of the pastoral problems facing the Church in Africa and in particular the urban centers The dichotomy between the formation of conscience and the actual life experienced by a considerable number of Christians in Africa today is a crucial moral and pastoral challenge The author makes the recommendation that African realities should determine the priorities in inculturation and should provide the context for a move towards African Christian conscience back cover *Small Town Africa* Jonathan Baker,1990
