OLANDER, Patricia WARRICK, 1974 **Science Fiction and the Dismal Science** Gary Westfahl, Gregory Benford, Howard V. Hendrix, 2019-11-27 Despite the growing importance of economics in our lives literary scholars have long been reluctant to consider economic issues as they examine key texts This volume seeks to fill one of these conspicuous gaps in the critical literature by focusing on various connections between science fiction and economics with some attention to related fields such as politics and government Its seventeen contributors include five award winning scholars five science fiction writers and a widely published economist Three topics are covered what noted science fiction writers like Robert A Heinlein Frank Herbert and Kim Stanley Robinson have had to say about our economic and political future how the competitive and ever changing publishing marketplace has affected the growth and development of science fiction from the nineteenth century to today and how the scholars who examine science fiction have themselves been influenced by the economics of academia Although the essays focus primarily on American science fiction the traditions of Russian and Chinese science fiction are also examined A comprehensive bibliography of works related to science fiction and economics will assist other readers and critics who are interested in this subject **Science Fiction and Speculative Fiction** P. L. Thomas, 2013-09-03 Why did Kurt Vonnegut shun being labeled a writer of science fiction SF How did Margaret Atwood and Ursula K Le Guin find themselves in a public argument about the nature of SF This volume explores the broad category of SF as a genre as one that challenges readers viewers teachers and scholars and then as one that is often itself challenged as the authors in the collection do SF this volume acknowledges is an enduring argument The collected chapters include work from teachers scholars artists and a wide range of SF fans offering a powerful and unique blend of voices to scholarship about SF as well as examinations of the place for SF in the classroom Among the chapters discussions focus on SF within debates for and against SF the history of SF the tensions related to SF and other genres the relationship between SF and science SF novels SF short fiction SF film and visual forms including TV SF young adult fiction SF comic books and graphic novels and the place of SF in contemporary public discourse The unifying thread running through the volume as with

Sociological Re-Imaginations in & of Universities Mohammad H. Tamdgidi, 2009-06-01. This Summer 2009 VII 3 issue of *Human Architecture Journal of the Sociology of Self Knowledge* is devoted to the theme *Sociological Re-Imaginations in & of Universities*. As part of the journal's continuing series critically engaging with C Wright Mills' sociological imagination is the proposition that the best way to theorize and practice sociology is via a continual conversation between the study of one's personal troubles and that of broader public issues. The present issue turns its attention to fostering sociological re-imaginings in and of universities. Several faculty, recent graduates or alumni and current undergraduate students advance insightful critical perspectives about their own learning and teaching experiences and personal troubles and broader university disciplinary and administrative public issues that in their view merit immediate attention in favor of fundamental rectifications of outdated procedures and educational habits that continue to persist at the cost of more creative and in fact more scientific and rational approaches to production and dissemination of knowledge.
