The Sociocultural Context of Psychosocial Interventions Francisco José Eiroa-Orosa, Tim Lomas, Michael Rowe, 2018-12-06 Across diverse academic fields scholars and practitioners are engaged in developing interventions to promote outcomes like health and quality of life Indeed such is the apparent efficacy of such interventions that there are many policy led initiatives to implement these at national and international scales However few scholars or practitioners have thought in any systematic and critical way about the importance of contextualizing these interventions i e considering how the impact of such interventions may be affected and mediated by specific sociocultural factors from gender to ethnicity and socio economics The aim of the Research Topic The Sociocultural Context of Psychosocial Interventions was to address this lacuna As such we tried to help bringing a more contextual mindset to the implementation of health and wellbeing interventions This may help to shift the way such interventions are designed and implemented both at a granular local level i e influencing individual practitioners and at a large scale macro level e g influencing policy makers Themes within this Research Topic have concerned both macro sociocultural as well as meso and micro layers and the peculiarities of implementing real world research based on these levels There has been room for physical and mental health for family relationships for educational contexts and even for the effects of crime Some works have included interesting methodological discussions on the integration of different ecological layers or the modal distribution of our interests For us it has been very important to work giving a greater diffusion to these issues since considering psychosocial interventions in the context in which they occur goes beyond an epistemological or methodological discussion Rather these considerations seriously affect the ability of practitioners to really reach the people who need their interventions listening to their needs and respecting their preferences For the editors of this book then the contextualization of interventions means considering the people who receive them as full citizens immersed in complex societies where factors such as social justice and health or well being do not float apart in space but affect each other dialectically We therefore think that the duty of both academics and practitioners is not to forget that it is as important to evaluate the direct effect of our interventions as the influence we have in the society as a whole when we carry them out We hope you enjoy reading these works and that their dissemination stimulates new lines of research committed to both good practise and social transformation

Hip-Hop, Art, and Visual Culture Jeffrey L. Broome, Lisa Munson, 2020-04-02 Visual art has been tied to hip hop culture since its emergence in the 1970s Commentary on these initial connections often emphasizes the importance of graffiti and fashion during hip hop s earliest days Forty years later hip hop music has grown into a billion dollar global industry and its influence on visual art and society has also expanded This book length printed edition of Arts collects essays by scholars who explore this evolving influence through their work in art education cultural theory and visual culture studies The topics covered by these authors include discussions on identity and cultural

appropriation equity and access as represented in select works of art creativity and copyright in digital media and the use of fine art tropes within the sociocultural history of hip hop As a collected volume these essays make potentially important contributions to broadening the narrative on art education and hip hop beyond the topics of graffiti fashion and the use of cyphers in educational contexts

Research on Dictionary Use in the Context of Foreign Language Learning Yukio Tono, 2012-05-10 The purpose of this book is to conceptualise the research on dictionary use within a more general overview of language learning It brings together some of the findings of studies on dictionary users and uses and shows how research into dictionary use can contribute to the improvement of dictionary design and the clarification of issues in language learning The book also provides reports on a series of empirical studies on dictionary use in decoding activities reading comprehension and L2 L1 translation which will shed some light on the nature of the issues discussed throughout the book The book falls into two parts Part I Research on Dictionary Use State of the Art is as its title suggests a summary of previous studies to tease out relevant issues in each area of inquiry Part 2 Empirical Studies reports on a series of studies the author has conducted in the past 15 years The first three studies Chapter 5 6 and 7 investigate dictionary use in the broader context of language learning The next four studies Chapter 8 9 10 and 11 report on a series of controlled experiments on the relationship between the macro and microstructure of the dictionary and reference skills Finally the last two chapters Chapter 12 and 13 report the use of learner language data for a better lexicographical output
