Sociotherapy And Psychotherapy:

Sociotherapy and Psychotherapy Marshall Edelson, 1970-01-01 **The Practice of Clinical Sociology and Sociotherapy** Llewelyn Alex Swan, 1984 **Alcohol and Tobacco** Otto-Michael Lesch, Henriette Walter, Christian Wetschka, Michie Hesselbrock, Victor Hesselbrock, 2011-01-15 Alcohol and nicotine addiction mostly occur together Over the last ten years therapeutic aspects and motivational strategies have been considerably improved Hence groups and subgroups have been defined and can be treated with specific medication and tailor made psychotherapies leading in the long term to considerably better and more effective results than the once broadly applied rigorous abstinence based therapies However alcohol and nicotine addiction still represent major medical and social problems In this book new therapeutic approaches are comprehensively described outlining the different interactions between personality environment and the effects of the substance In addition to prevention based therapies and diagnosis essential psychological and sociological strategies as well as medication based therapies are also presented in detail All of these therapies have realistic aims and are of global validity In addition the book provides a broad overview of the American and European epidemiology of alcohol and nicotine addictions The book is written for all those who care for and offer professional therapy for alcohol and nicotine addicted patients The Individual and the Group Malcolm Pines, 2012-12-06 Malcolm Pines and Lise Rafaelsen The Seventh International Congress of Group Psychotherapy organized in Copenhagen by the International Association of Group Psychotherapy was one of the largest and most representative congresses on this subject that has yet been held Probably for the first time we achieved the declared aim of the International Association that of bringing together representatives of the different approaches to group psychotherapy in the same forum to allow for communication exchange and development of our relations Previous congresses have been less representative and it seems to augur well for the future of the Association and of its congresses that there was this strong force and wish for unification and for exchange within the field of group psychotherapy The Congress theme The Individual and the Group Boundaries and Interrelations in Theory and Practice was chosen because it gave an opportunity once again to examine the very basis for group psychotherapy as theory and as practice The basic theme stated in the opening papers by Professor Marie Jahoda and Professor James Anthony was replayed daily with new developments and variations according to the theoretical position of each subsequent speaker The Large Group Lionel Kreeger, 2019-08-22 This important pioneering book collates our knowledge of large groups both at a theoretical and practical level Thirteen distinguished contributors offer experiences from a wide range of disciplines and settings Roughly half the chapters are psychoanalytic in their orientation other contributions derive from general psychiatry sociology anthropology and industrial psychology The place of large group therapy is still to be defined but it is hoped that this book will contribute to the careful and detailed assessment that is necessary to fulfill its evaluation **Applied and Clinical Sociology in Aotearoa New Zealand** Zarine L. Rocha, Kathy L. Davidson, 2023-12-19 This is the first volume to

explore clinical and applied sociology in Aotearoa New Zealand while also providing unique insights into the practice of sociology internationally Drawing out the intersections between sociological research public sociology and applied sociology the chapters in this volume enrich the rapidly growing field of international clinical sociology Aotearoa New Zealand presents an important case study in the development and practice of sociology with a vibrant social scientific community and a significant diversity of scholars and practitioners local research and practice highlight the country s innovative and often unusual approaches to addressing social problems This volume brings together a diversity of scholars and practitioners from the country s top sociologists to early career researchers and provides a comprehensive and valuable exploration of sociology and its many practical applications in this unique context It covers a wide range of key topics in the field from the challenges of practicing a public sociology in Aotearoa New Zealand to the role of applied and clinical sociologists in government and consultancies Contemporary social issues are explored as case studies including practising sociological psychotherapy indigenous applications of sociology and M ori language learning and applying sociology within healthcare This is a key addition to applied and clinical sociology literature

Grounded-Encounter Therapy L. Alex Swan,2013-10 Grounded Encounter Therapy is a discovery intervention and application approach which allows the theory which guides the process to be developed from an analysis of the situation or context rather than imposed at the outset by the therapist It is a dramatic contrast to psychological theories particularly psychoanalysis which impose a specific causal theory at the outset In GET on the other hand the theory emerges from the client defined context not the other way around The book introduces students and professionals an alternative to doing counseling and therapy Traditional therapist see what they look for and what they look for they see and what they see is what their therapeutic modalities allow them to see and what their therapeutic modalities allow them to see is what they treat
