**Human Trafficking and Human Security** Anna Jonsson, Anna Jonsson Cornell, 2009 Human trafficking and the related problems of organised crime and prostitution has become a serious problem for post Soviet countries since the dissolution of the Soviet Union Human trafficking has a major impact on the countries of origin the destination countries and the countries of transit and is a concern for those studying population and migration economics politics international

relations and security studies This book examines human trafficking from post Soviet countries exploring the full extent of the problem and discussing countermeasures both local and at the global level and considering the problem in all its aspects It focuses in particular on the experiences of the Baltic Sea region setting out the nature of organised crime and the full range of threats against society *EU-Russian Border Security* S. V. Golunov, 2013 The land border between Russia and the European Union is one of the longest land borders in the world with very considerable trade flowing across the border in both directions This book examines the nature of the EU Russia border and the issues connected with its management It describes the territories and the societies on each side of the border discusses the challenges which confront border management including migration and criminal activities and explores how people on both sides perceive each other and perceive threats and security issues It concludes by assessing achievements to date in managing the border and by assessing continuing unresolved challenges European Security Policy and Strategic Culture Peter Schmidt, Benjamin Zyla, 2013-09-13 With the Lisbon Treaty in place and the European Union increasingly involved in international crisis management and stabilization operations in places near and far this volume revisits the trajectory of a European strategic culture Specifically it studies the usefulness of its application in a variety of circumstances including the EU's operations in Africa and the Balkans as well as joint operations with NATO and the United Nations The contributors find that strategic culture is a useful tool to explain and understand the EU's civilian and military operations not in the sense of a cause but as a European normative framework of preferences and constraints Accordingly classical notions of strategic culture in the field of international security must be adapted to highlight the specific character of Europe's strategic culture especially by taking the interaction with the United Nations and NATO into account Though at variance over the extent to which security and defence missions have demonstrated or promoted a shared strategic culture in Europe the authors reveal a growing sense that a cohesive strategic culture is critical in the EU's ambition of being a global actor Should Europe fail to nurture a shared strategic culture its actions will be based much more on flexibility than on cohesion This book was published as a special issue of Contemporary Security Policy *Foundations of Homeland Security* Martin J. Andrew Cottey, Derek Averre, 2002 Cubism was the most influential artistic movement that emerged in the twentieth century The hallmarks of its style were stamped on the art design and architecture and its aesthetic principles governed the representation of modernity across all the arts Yet just what cubism was or stood for at the time of its emergence is still in dispute while the explanations offered for its importance for twentieth century art and its legacy for the present are

bewildering in their variety This fascinating book offers a way beyond this confusion a narrative of its beginnings consolidation and dissemination that takes into account not only what the style and the movement signified at the time of its emergence but also the principal writings through which cubism s significance for modernism has been established Visually stunning with over 100 illustrations this is an essential work for all students and teachers of modern art history
