Soil Conditioners and Amendment Technologies Arthur Wallace, Corbett, 1995-12-01 *Handbook of Soil Conditioners* Wallace, 2020-10-28 This work features scientific technical and practical information on mineral organic and synthetic conditioners as well as their beneficial effects on the soil's physical properties that promote optimal plant growth maximize soil fertility and enhance biomediation processes It promotes the synergistic use of various agricultural technologies to manage global concerns of decreasing arable land **Soil Conditioners and Amendment Technologies** Arthur Wallace, 1998-04-01 *Closing the Crop-yield Gap Through Better Soil and Better Management* Arthur Wallace, Garn A. Wallace, 2003 *Sustainable Management of Nematodes in Agriculture, Vol.1: Organic Management* Kamal Kishore Chaudhary, Mukesh Kumar Meghvansi, 2022-09-12 The present work covers many aspects of plant nematode management using organic strategies These range from applications of latest understandings of fundamental concepts mechanisms of nematode control to modern tools and techniques used in efficacy evaluation The Volume also includes some case studies applied aspects of organic nematode pest management Chemical and physical control measures used for nematode management have their own implications Against this backdrop organic management of plant nematodes appears as a more rational and sustainable approach However concise information on the current topic is scarce This book is a sincere effort to bridge this void as we aim to provide the most updated critical and in depth knowledge synthesized by many experts working in the field of plant nematology worldwide *Algal Bioreactors* Eduardo Jacob-Lopes, Leila Queiroz Zepka, Mariany Costa Depira, 2024-11-21 *Algal Bioreactors Science Engineering and Technology of Upstream Processes Volume One* is part of a comprehensive two volume set that provides all of the knowledge needed to design develop and operate algal bioreactors for the production of renewable resources Supported by critical parameters and properties mathematical models and calculations methods and practical real world case studies readers will find everything they need to know on the upstream and downstream processes of algal bioreactors for renewable resource production Bringing together renowned experts in microalgal biotechnology this book will help researchers scientists and engineers from academia and industry overcome barriers and advance the production of renewable resources and renewable energy from algae Students will also find invaluable explanations of the fundamentals and key principles of algal bioreactors making it an accessible read for students of engineering microbiology biochemistry biotechnology and environmental sciences Presents the physical biological environmental and economic parameters of upstream processes in the operation and development of algal bioreactors to produce renewable resources Explains the main configurations and designs of algal bioreactors presenting recent innovations and future trends Integrates the scientific engineering technology environmental and economic aspects of producing renewable resources and other valuable bioproducts using algal bioreactors Provides real world case studies at various scales to demonstrate the practical implementation of the various technologies and methods discussed Biochar

for Environmental Management Johannes Lehmann, Stephen Joseph, 2015-02-20 Biochar is the carbon rich product which occurs when biomass such as wood manure or crop residues is heated in a closed container with little or no available air. It can be used to improve agriculture and the environment in several ways and its persistence in soil and nutrient retention properties make it an ideal soil amendment to increase crop yields. In addition to this, biochar sequestration in combination with sustainable biomass production can be carbon negative and therefore used to actively remove carbon dioxide from the atmosphere with potentially major implications for mitigation of climate change. Biochar production can also be combined with bioenergy production through the use of the gases that are given off in the pyrolysis process. The first edition of this book published in 2009 was the definitive work reviewing the expanding research literature on this topic. Since then the rate of research activity has increased at least ten fold and biochar products are now commercially available as soil amendments. This second edition includes not only substantially updated chapters but also additional chapters on environmental risk assessment on new uses of biochar in composting and potting mixes, a new and controversial field of studying the effects of biochar on soil carbon cycles on traditional use with very recent discoveries that biochar was used not only in the Amazon but also in Africa and Asia on changes in water availability and soil water dynamics and on sustainability and certification. The book therefore continues to represent the most comprehensive compilation of current knowledge on all aspects of biochar.

Biodegradation of Nitroaromatic Compounds and Explosives Jim C. Spain, Joseph B. Hughes, Hans-Joachim Knackmuss, 2000-06-14 Filled with practical applications and research, *Biodegradation of Nitroaromatic Compounds and Explosives* presents an international perspective on environmental contamination from explosives. It covers biodegradation strategies for DNT and a wide variety of other nitroaromatic compounds of environmental significance and makes the information accessible.

Agricultural Land Improvement: Amelioration and Reclamation - Volume II Boris Stepanovich Maslov, 2009-09-23 Agricultural Land Improvement: Amelioration and Reclamation theme is a component of Encyclopedia of Food and Agricultural Sciences Engineering and Technology Resources in the global Encyclopedia of Life Support Systems (EOLSS) which is an integrated compendium of twenty one Encyclopedias. The theme on Agricultural Land Improvement: Amelioration and Reclamation has two volumes with contributions from distinguished experts in the field. It discusses amelioration practices and measures for radical improvement of unfavorable hydrologic soil and agroclimatic conditions with a view to the most efficient use of land resources. The content of the theme is organized with state of the art presentations covering the following aspects of the subject: Necessity of Development of Land Reclamation; Irrigation Drainage of Farmlands; Chemical Amelioration of Soils; Biological and Agrotechnical Amelioration which are then expanded into multiple subtopics each as a chapter. These volumes are aimed at the following five major target audiences: University and College Students; Educators; Professional Practitioners; Research Personnel; and Policy Analysts, Managers and Decision Makers and NGOs.
