Soil Erosion Crisis In Americas Croplands:

Soil Erosion Sandra S. Batie, 1983 Perspectives on Sustainable Resources in America Roger A. Professor Sedjo, 2010-09-30 The vast size of the United States and extensive variation of its climate topography and biota across different regions contribute to both the richness of the nation's natural heritage and the complexities involved in managing its resources A follow up to RFF's popular America's Renewable Resources 1990 *Perspectives on Sustainable Resources in America* updates readers about the current challenges involved in managing America's natural resources especially in light of the increasing emphasis on sustainability and ecosystem approaches to management Written to inform general audiences and students as well as to engage the interest of experts the book includes assessments by some of the nation's most renowned scholars in natural resource economics and policy An introductory chapter critically examines the concept of sustainability as it has been developed in recent years and asks how the concept might apply to individual resource systems It considers the interrelatedness of ecosystem economic and social sustainability the paradigms of resource sufficiency and functional integrity and the contrast between weak and strong sustainability The chapters that follow examine America's experience with forests water agricultural soils and wildlife Highlighting the adaptability and resilience of resource systems each chapter provides a description of the physical characteristics of the resource a history of its use a policy history and a review of ongoing debates in management and policy *Perspectives on Sustainable Resources in America* concludes with an innovative treatment of biodiversity as a natural resource The chapter reviews the definitions of biodiversity the ecological and economic meanings of biodiversity and current efforts to preserve biodiversity especially through regulatory approaches

The State of Conservation Joshua Nygren, 2025-01-06 In the twentieth century natural resource conservation emerged as a vital force in US politics laying the groundwork for present day sustainability Merging environmental agricultural and political history Joshua Nygren examines the political economy and ecology of agricultural conservation through the lens of the conservation industrial complex This evolving public private network which united the US Department of Agriculture Congress local and national organizations and the agricultural industry guided soil and water conservation in rural America for much of the century Contrary to the classic tales of US environmental politics and the rise and fall of the New Deal Order this book emphasizes continuity Nygren demonstrates how the conservation policies programs and partnerships of the 1930s and 1940s persisted through the age of environmentalism and how their defining traits anticipated those typically associated with late twentieth century political culture The conservation industrial complex promoted a development oriented brand of conservation that aided the rise of large scale capital intensive agriculture which continues today It also reshaped the physical and political landscapes of the country leading to impressive conservation victories and spectacular failures by privileging some environments degrading others and intensifying farm depopulation In the name of environmental protection agricultural conservation made rural America less equal **Regional Soil and Water Conservation Needs** United States.

Guither, Robert Hughes, 1991 **Agriculture Information Bulletin**, 1949 Soil and Water Quality National Research Council, Board on Agriculture, Committee on Long-Range Soil and Water Conservation Policy, 1993-02-01 How can the United States meet demands for agricultural production while solving the broader range of environmental problems attributed to farming practices National policymakers who try to answer this question confront difficult trade offs This book offers four specific strategies that can serve as the basis for a national policy to protect soil and water quality while maintaining U.S. agricultural productivity and competitiveness Timely and comprehensive the volume has important implications for the Clean Air Act and the 1995 farm bill Advocating a systems approach the committee recommends specific farm practices and new approaches to prevention of soil degradation and water pollution for environmental agencies The volume details methods of evaluating soil management systems and offers a wealth of information on improved management of nitrogen phosphorus

manure pesticides sediments salt and trace elements Landscape analysis of nonpoint source pollution is also detailed Drawing together research findings survey results and case examples the volume will be of interest to federal state and local policymakers state and local environmental and agricultural officials and other environmental and agricultural specialists scientists involved in soil and water issues researchers and agricultural producers

Commodity and Resource Policies in Agricultural Systems Richard E. Just, Nancy Bockstael, 2012-12-06 Agricultural natural resource and environmental problems are becoming increasingly interdependent For example soil erosion is largely determined by agricultural land use Both water use and water contamination depend on land use and technology choice in agriculture In many areas the fertilizers and pesticides used in agriculture are major pollutants of ground and surface water having adverse effects on drinking water and fisheries Agricultural pollutants such as pesticides also produce adverse health effects for agricultural workers and the consuming public On the other hand the availability of water resources and the value of competing land uses influence agricultural production Additionally regional air quality problems may affect crops and global environmental trends may have long term implications for farming Agriculture natural resources and environmental quality are all heavily regulated in the U S but they are done so by a vast array of competing or unrelated agencies within the U S Departments of Agriculture Interior and Commerce the Environmental Protection Agency and numerous state agencies Considering the large number of bureaucratically remote public agencies involved and the pervasive interdependencies between agriculture natural resources and the environment policies develop which are at best uncoordinated and at worst conflicting and counterproductive These policies have become sources of controversy as different interest groups struggle to affect their implementation as different agencies have fought for administrative control and as legislative bodies have attempted to enact piecemeal changes

Farmland, a Community Issue Susan Boyd, Cynthia McGrath, 1987 This booklet is a general introduction to the complex interrelationship between agricultural policies and practices the depletion and contamination of soil and water and public health It focuses on the ecological and economic aspects of sustainable agriculture and their impact on individuals and communities Its goal is to build support for sustainable farming among the 97% of the population who do not farm but who can influence change through their choices voices and votes Cover verso

Plowed Under Andrew P. Duffin, 2009-11-17 In *Plowed Under* Andrew P. Duffin traces the transformation of the Palouse region of Washington and Idaho from land thought unusable and unproductive to a wealth generating agricultural paradise weighing the consequences of what this progress has wrought During the twentieth century the Palouse became synonymous with wheat and the landscape was irrevocably altered At the dawn of the twenty first century native vegetation is almost nonexistent stream water is so dirty that it is often unfit for even livestock and 94 percent of all land has been converted to agriculture Commercial agriculture also created a less noticeable ecological change soil erosion While common to industrial agriculture nationwide topsoil loss evoked different political and social reactions in the Palouse Farmers all over the nation take pride in

their freedom and independence but in the Palouse Duffin shows this mentality a remnant of an older agrarian past has been taken to the extreme and is partly responsible for erosion problems that are among the worst in the nation In the hope of charting a better more sustainable future Duffin argues for a candid look at the land its people their decisions and the repercussions of those decisions As he notes the debate is not over whether to use the land but over what that use will look like and its social and ecological results

Taming the Yellow River: Silt and Floods L.M. Brush,M. Gordon

Wolman,2012-12-06 About four years ago Dr Gilbert White visited China and sowed the seeds of this project through conversations with Drs Huang and Gong of the Chinese Academy of Sciences and Mr Long of the Yellow River Conservancy Commission After some additional rounds of communications by letter the plan for a workshop evolved and Drs Wolman and Brush visited with Dr Sabadell of the National Science Foundation to begin the initial planning In March 1987 Dr Brush visited China and the details were worked out for the October 1987 workshop At the outset it was recognized that the 10 American scientists and engineers had very little knowledge of the Yellow River and none had ever seen it Therefore it became important that field trips be scheduled before the workshop to better set the stage for fruitful discussions It was also acknowledged that the American participants could not present papers about the Yellow River per se so their offerings reflected their general knowledge of rivers using other rivers as examples On the other hand the Chinese participants were all well into the difficult problems of harnessing the Yellow River and made their presentations accordingly Despite these differences the subject matter was the unifying thread and cross communication was excellent
